CHAMPION NURSERIES

PERRY (Phone 2451) OHIO

TO OUR FRIENDS:

We wish to take this opportunity to extend our appreciation to increasing thousands of customers who are buying from us each season. More people planted Champion Fruit Trees and Berry Plants than in any previous year of the 56 which we have been in business. This year we present our new catalogue to thousands of new prospects who have become acquainted with our nursery through friends who are our well satisfied customers.

It is our aim to grow and supply you with the finest, most productive fruit trees and plants which it is possible to grow. For the past 56 years it has been our aim to improve and select the best strains of fruit trees and even this year the selection and improving remains our chief objective. We take great pride in the Quality Fruit Trees and Plants we grow, and we are able to give personal supervision to each and every order. It is our desire, and with untiring effort we

THE GENEVA SAVINGS AND TRUST COMPANY

GENEVA, OHIO

January 29, 1945

To Whom It May Concern:

The Champion Nurseries, A. N. Champion of Perry, Ohio, have been customers of the Geneva Savings and Trust Company for a good many years, and carried a substantial balance.

I have had occasion to watch the Champion Nurseries and their fair dealings with the public, and do not hesitate to say that I think they are absolutely honest, fair in their dealings, and reliable.

Yours truly,

A. A. Searle

President

AAS/ts

work with the one object in view, that every customer be a **SATISFIED CUSTOMER.**

In supplying you with our stock we feel that we are giving you the best stock obtainable. If at any time questions arise regarding selection of varieties, planting, or after care, do not hesitate to write and we will be pleased to give any information possible.

It is easy to order by mail and while we do a large mail order business we also extend to our friends an invitation to visit our nurseries and make a personal selection of trees. After your first order of CHAMPION STOCK you too will join the large list of our satisfied customers.

Yours very truly,

A. N. CHAMPION

SATISFACTION GUARANTEED

We guarantee the delivery to YOU, our CUSTOMER, of all nursery stock in first class condition. If for any reason at all, the shipment does not arrive in first class condition, notify us at once and we will make prompt satisfactory adjustment.

We guarantee to deliver to you healthy, vigorous stock, free from disease which if properly handled and planted will grow. However, if, due to unfavorable weather, such as drought, excessive rainfall, or other conditions over which we have no control, they fail to grow, we will replace at half price. You must notify us of the failure to grow not later than **JULY 10th** following the season in which they were purchased.

For your assurance of buying trees which are true to name we ask you to read the statement of inspection which appears on this page. To our new customers, you may write to the Ohio Agricultural Experiment Station at Wooster, Ohio; to the Michigan State Ex-

periment Station at Lansing, Mich., or to the Department of Horticulture at Ohio State University, Columbus, Ohio.

As to our reliability in financial matters, we call your attention to the letter which appears on the opposite page. You may also write to the Citizens Bank, Madison, Ohio, The Federal Savings and Loan, Painesville, Ohio, or to any place of business in Perry, Painesville, Madison, or Geneva.

PLANTING A FRUIT GARDEN

This year we were able to secure a quantity of this small booklet which we are offering while they last to our customers. It contains, planning, trimming, feeding, thinning, spraying and after care for the successful growing of fruit trees and berry plants. The man that wants to grow his own fruit should not be without this booklet. Please mail 25c to cover the cost of handling and mailing and we will send it to you promptly.

MASSACHUSETTS TRUENESS-TO-NAME INSPECTION SERVICE

A service to nurserymen and fruit growers to promote trueness to name of fruit varieties.

Sponsored by The Massachusetts Fruit Growers' Association

Statement of Inspection for Trueness-to-name

Amherst, Mass., August 6, 1947

To Whom It May Concern:

This is to state that all of the saleable apple, pear, plum and sweet cherry stock now growing in Champion Nurseries, Perry, Ohio, have been examined for trueness-to-name by A. P. French, O. C. Roberts, and W. H. Thies. To the best of our knowledge and belief, these trees are true-to-name as they now stand in the nursery row.

J. K. Shaw

Jumbo Fruit Trees . . .

PLANT OUR **JUMBO** FRUIT TREES

And Insure a QUICK PROFITABLE CROP of DELICIOUS Fruit

THESE ARE THE TREES YOU HAVE
BEEN WAITING FOR

For several years the demand has steadily increased for larger, nicer, and quicker bearing trees. We now offer them in limited quantities. These are called JUMBO trees as it is often possible to reduce the time from planting until you pick your first fruit, from one half to three quarters of the time required by most regular grade nursery trees.

The SUPPLY of these "Jumbo" trees is limited and if you are anxious to make use of this wonderful opportunity we would suggest that you fill out the enclosed order sheet at once so you will be sure to receive your ORDER of "Jumbo" trees which will be shipped to you at the correct planting time or you may specify the shipping date if you so desire.

PEACH TREES FROM ORCHARDS with HIGH PRODUCTION RECORDS

CHAMPION'S PEACH TREES ARE TESTED AND PROVEN STRAINS

Without a doubt there are no better peach trees produced than the ones which are grown on sandy or gravelly loam soil and in the winter conditions which exist here at Perry. This type of soil produces a very fibrous root system and the winter weather which we have tends to develop a strong, healthy, vigorous, hardy tree. We are large growers of Peach Trees and we are justly proud of the long list of commercial planters who depend on us for trees in their new plantings. Peaches can be grown on any soil that will produce the average yield of farm crops, however, they are especially adapted to lighter soils.

BELLE OF GEORGIA. Very large, white flesh with red cheek, of excellent quality. August.

CHAMPION. An extremely large, handsome early variety, creamy white with red cheek. August.

CUMBERLAND. The flesh is white, almost free, firmer and better quality than Carman.

ELBERTA. The most widely planted peach variety in America. A very large yellow fruit with a red cheek, a good shipper and succeeds everywhere. Ripens in September.

EARLY ELBERTA. Ripens about a week earlier than Elberta.

GOLDEN JUBILEE. A large early yellow peach. The skin is yellow blushed with red. A good freestone.

HALE-HAVEN. This variety is fast taking its place at the top of the list in orchard and home plantings. A yellow freestone, of high quality, ripening ahead of Elberta.

LEMON FREE. Large, resembling a lemon in shape and color, immensely productive and of excellent quality for canning. Late September.

ORIOLE. The fruit is medium to large, roundish, yellow, very good in quality and a freestone. August 15.

The Sensational

RED HAVEN

Tops All Extra early Peaches

Earliest Yellow Freestone Peach

The new early ripening Yellow Peach that ripens about 10 days before Golden Jubilee.

Brilliant red color with creamy yellow background, smooth skin, almost fuzzless. Reddens before it ripens.

ROCHESTER. A fine peach of good size. Bears young and a good cropper, ripening about August 10.

SALBERTA. Late September. Large yellow, freestone.

SHIPPER'S LATE RED. A little larger than Elberta and is covered with red, of good flavor and free stone. September.

SOUTH HAVEN. Large, yellow blotched with red. September 1.

WILMA. Large as Elberta, colors much better, and ripens about ten days later.

OUR 1947 INTRODUCTION

★ **ALBRU** A peach as large or larger than Hale. However, in many ways it excells Hale. It ripens in like season and is a large round red cheeked peach of excellent quality. It handles well, thus making it a fine variety both for retail and wholesale markets.

INTRODUCING FIVE ALL STAR PEACHES . . .

★ **GOLDENEAST** A very large, high colored, yellow fleshed peach ripening 14 to 15 days before Elberta. The fuzz is light like Hale. The red coloring of the fruit begins well in advance of the shipping stage and softening of the flesh proceed slowly before and after it is picked, making it an ideal peach for the wholesale and retail market.

★ **SUMMERCREST** Summercrest is a large oval yellow freestone. No one wants an Elberta after eating a ripe Summercrest. The fruit is well colored, but not quite as high in color as Goldeneast.

★ **TRIOGEM** A firm, yellow-fleshed freestone of high quality ripening 2 or 3 days after Golden Jubilee. It is a better commercial variety than Golden Jubilee.

★ **SUNHIGH** A large, yellow freestone, ripening a few days before Goldeneast. The fruit buds are somewhat hardier than Goldeneast and for that reason it has been more productive in those areas in which low winter temperatures occur frequently.

★ **FIREGLOW** A large yellow fleshed peach, which begins to ripen a few days after Golden Jubilee. The color is very bright for several days before ready to pick and its all over red color makes it readily saleable while yet very firm.

DWARF APPLE TREES

ON MALLING
UNDERSTOCK

STAYMENS WINESAP DWARF APPLE TREE

These small but heavy bearing trees were developed to fill a long felt need. Many small homes are on city lots so small that it is quite impossible to grow regular fruit trees. These trees are really small when mature and can be planted as close as ten to twelve feet. But the best part of all is that they produce full sized fruit which in every respect is equal to the fruit grown on large regular size trees. Of course these small midget trees cannot be expected to have as much fruit on each tree as do the large ones. However, rest assured that they do bear enough to supply the average family.

4 to 5 ft. \$4.00 each; 3 to 4 ft. \$3.50 each; 2 to 3 ft. \$3.00 each
Red Delicious, Jonathan, McIntosh, Staymens Winesap, Wealthy, Yellow Transparent

DWARF PEAR TREES . . .

These trees are like the dwarf apple, created for a special need. They are ideal for the home owner with a small lot. They take up very little space and yet are very productive, taking into consideration the miniature size of the tree.

4 to 5 ft. \$3.50 each (Bartlett only).

3 to 4 ft. \$3.00 each; 2 to 3 ft. \$2.50 each Bartlett, Duchess and Seckel

PLANTING DIRECTIONS: When planting a y dwarf fruit tree make sure that the bud union, which is the slight crook just above the roots, is one or two inches above the level of the ground after planting. Should the portion of the tree above the bud union be under the ground it will develop roots and the tree will no longer remain a dwarf. Dwarf trees have a small light root system and it is often necessary to stake each tree until it is well established.

PLANTERS: send us a list of the trees you intend to plant as we can quote special prices to the orchardist.

CHAMPION'S APPLE TREES FROM TESTED BEARING ORCHARDS

In making your selection of varieties both for the home orchard and for your commercial planting you will find most of the better varieties which have proven successful in the section where you live. Varieties ripening over the entire apple season are here — varieties well chosen both for their shipping and keeping qualities. When choosing varieties for your home orchard always pick a large percentage of trees having fruit which ripens in late fall as these are the ones which will keep and may be enjoyed through the winter months. Always keep in mind that our trees are northern grown and have proven very satisfactory to growers universally because of the extra strength and hardiness our climate develops in them. It will more than pay you to plant fruit trees tempered and hardened in our northern climate.

APPLE TREE PRICES

	1 to 9	10 to 49	50-299
2 yr., 5 to 6', $\frac{1}{16}$ " up	\$1.85	\$1.55	\$.95

2 yr., 3 to 4', $\frac{1}{16}$ to $\frac{1}{8}$ "	1.25	1.00	.65

ASTRACHAN, RED, (Summer). They are fit for cooking long before maturity and when fully ripe are fine for dessert, having a long season of usefulness. Ripens about the last of July.

BALDWIN, (Winter). Large, bright red, crisp, juicy and firm. The old favorite for home use.

BANANA, (Winter). An early bearer, yellow shaded with bright crimson.

CHAMPION'S SUPREME. (Summer). A large well colored fruit ripening in July. It is a great favorite with the home gardener as it quite often bears some fruit the following year after planting.

CORTLAND, (Winter). A derivation of McIntosh, but ripening about two weeks later. Fruits abundant, large, round, with heavy overlay of shaded reds. Hangs on the tree longer than McIntosh and is a little tougher skinned, making a better shipper.

DOUBLE RED DELICIOUS. (Winter). A remarkable variety, rapidly taking first place. Fruit extra large; color bright red; flesh white and fine grained, rich, melting and juicy, of the very highest quality; tree young bearer, sometimes at age of three years from planting.

NORTHERN SPY APPLE

DUCHESS (of Oldenburg). (Autumn).. The fruit is large striped red and yellow, flesh white, juicy, and of excellent flavor, the best general purpose apple of the season ripening in August and September.

GRIMES GOLDEN. (Winter). Good sized yellow, very productive and of high quality.

JONATHAN. (Winter). The extra quality, medium red fruit by general consent is placed among the very best in both appearance and quality.

LODI. (Summer). A new variety which greatly resembles one of its parents, Yellow Transparent. However, the fruits are larger and ripen a little later. This variety tends to bear young and is an annual bearer.

CHAMPION'S TREES FROM HIGH PRODUCTION STRAIN

RED SPY APPLE

MAIDEN BLUSH. (Fall). Handsome crimson cheeked, lemon yellow fruits. Very good for cooking, drying and for market. Keeps well until November.

McINTOSH. (Fall). An exceedingly valuable, hardy, attractive apple; good sized, nearly covered with red. Flesh white, fine, very tender, juicy and refreshing. Trees hardy, vigorous and a good annual bearer. Comes into bearing young, yielding large crops, ripens in September.

NORTHERN SPY. (Winter). It ranks among the top in quality and is excelled by few in keeping. Fruit large slightly conical, brightly striped with sunny side red, flesh white and tender.

RED ROME BEAUTY. (Winter). An improvement over the old fashioned Rome Beauty, due largely to its more intense red color which greatly aids in its market value.

RED NORTHERN SPY. (Winter). An improvement over the old northern spy. Deep red, bears younger but same fruit in taste and keeping qualities.

R. I. GREENING. (Winter). Trees are of large size and have a large spread of branches. This is the favorite green apple on the market today.

STAYMENS WINESAP. (Winter). Tree a quick and large grower coming into bearing at an early age. From medium to large attractive fruits green and yellow overlaid by dark red stripes.

ROME BEAUTY. (Winter). The tree is of medium size and comes into bearing young. The apples are large, handsome, uniform in size and shape, thick skinned and therefore ship and keep well. November to May.

WEALTHY. (Fall). One of the best early winter red apples, and due to its early bearing is much used as a filler. Flesh white, tender, juicy, sub-acid, quality very good.

YELLOW TRANSPARENT. (Summer). The tree is not a large grower but is extremely hardy and comes into bearing young. The apples are above medium size and are of a clear yellow color. Ideal for home market and a good seller.

YELLOW DELICIOUS. (Winter). Same delicious quality, but the color is a clear bright yellow. Tastes more mild and even better than Grimes Golden. Firm, crisp and very juicy.

CRAB APPLES

HYSLOP. Has long been one of the standard American crab apples, and is widely cultivated. The apples are a brilliant dark red overlaid with a heavy blue bloom.

CORTLAND APPLE

PLANT CHAMPION'S PEAR TREES PRODUCED FROM BLIGHT RESISTANT STRAINS

Cope's Seedless Pear

This new amazing pear resembles Bartlett in shape, size and color but possesses many qualities which are not found in Bartlett.

First it is Seedless and Coreless. Naturally this does away with core-rot which is so prevalent in other varieties of pears. This wonderful pear shows great resistance to the fatal fire blight.

It ripens a few days later than Bartlett which makes it a valuable market pear as well as a wonderful pear for home use. Imagine the time saved and the amount of fruit saved by the one reason of not having to core each pear when preparing it for table use or for canning.

PRICE OF COPE'S SEEDLESS PEAR

5 to 6 ft., 1 to 5 trees, \$3.50 each

PLANTERS ATTENTION: We now can offer for the first time, one year trees of the "OLD HOME PEAR." Write for special quotations.

PEAR TREE PRICES

	1-9	10-49	50 up
2 yr., 5 to 6', $\frac{1}{8}$ " up	\$2.25	\$1.85	\$1.40
2 yr., 4 to 5', $\frac{3}{8}$ to $\frac{1}{2}$ "	1.95	1.50	1.00
2 yr., 3 to 4', $\frac{1}{4}$ to $\frac{3}{8}$ "	1.75	1.30	.85

SUMMER VARIETIES

BARTLETT. Leads all the pears for the number of trees planted, as it is readily adaptable to a wide range of soil and climatic conditions. The fruits are large, handsome, and of a high quality, keeping and shipping remarkably well making it very desirable for the table or for market use.

CLAPP'S FAVORITE. It is the standard late summer pear to precede Bartlett, which it much resembles, in size, shape, flavor, and color.

GORHAM. The fruit ripens two weeks later than Bartlett and keeps a month longer. The fruit resembles Bartlett in size, color, and shape.

ANJOU. The fruits are large, uniform greenish yellow, with firm, juicy flesh, and as an early winter pear it has no superior.

BOSC. The fruits of this pear are nearly flawless in every character, extra large, long and tapering russet, good shipper and usually brings the highest market price. The quality is very good.

DUCHESS. Very large rich and juicy. Pick them before maturity, wrap in tissue paper and pack them away for complete ripening.

FLEMISH BEAUTY. A large, beautiful, very juicy and rich pear. September.

KIEFER. The large size, handsome appearance, and remarkable keeping and shipping qualities puts the fruit among the best keepers.

SECKEL. (Sometimes called the sugar pear). A small pear of excellent flavor, fine for pickling or dessert, very productive and a profitable commercial pear.

SHELDON. Medium sized, yellow, with a rich shaded cheek, flesh a little coarse, melting and juicy.

CHAMPION'S CHERRY TREES

MONTMORENCY SOUR CHERRIES

PLANTERS: Send us your list of trees which you want to plant and we will be pleased to quote special prices.

SWEET CHERRY TREE PRICES

	1-9	10-49
2 yr., 5 to 6', $\frac{1}{16}$ " and up	\$2.50	\$2.00
2 yr., 4 to 5', $\frac{9}{16}$ to $\frac{11}{16}$ "	2.00	1.75

SWEET CHERRIES

BING. Very large, dark brown, almost black, flesh firm, sweet and delicious. Fruits hang well on trees and ripen at one time. July.

BLACK TARTARIAN. Earlier than most other sweet cherries. It adapts itself to a wide variety of soil and climatic conditions.

GOVERNOR WOOD. One of the best sweet cherries, very large, light yellow, marbled with red, juicy, rich and delicious, tree healthy, large and a good bearer.

LAMBERT. Jet black when fully ripe. The fruit is meaty, juicy and has a very rich flavor. Late July.

NAPOLEON. Handsome appearance and high quality of fruit, and the quantity of fruit that is often produced on a single tree. The tree comes into bearing young and ripens in July.

SCHMIDT. The fruits are black and large. The tree is vigorous and productive. July.

WINDSOR. Fruit large liver colored and distinctive. Flesh remarkably firm and of high quality. A valuable late variety. July.

YELLOW SPANISH. The trees are the largest of the sweet cherries. The fruit is large yellow with red blush. Late June.

SOUR CHERRY TREE PRICES

	1-9	10-49	50 up
2 yr., 4 to 6 ft., $\frac{11}{16}$ "	\$2.25	\$1.80	\$1.30
2 yr., 3 to 5 ft., $\frac{9}{16}$ "	1.95	1.65	1.10
2 yr., 2 to 4 ft., $\frac{7}{16}$ "	1.50	1.25	.90

POLLINATION: When planting Bing, Lambert or Napoleon be sure to plant one tree of another variety. Windsor is a good variety to use as it is a thrifty, vigorous tree and is a good pollinator.

SOUR CHERRIES

ENGLISH MORELLO. In any way when prepared by cooking, it is one of the best. Ripens after Montmorency.

BRASSINGTON. An early, large dark red meaty cherry similar to May Duke in taste and usability.

MAY DUKE. Often called the half sweet and half sour cherry. Fine flavored and delicious to eat out of hand. One of the best pie cherries we know.

EARLY RICHMOND. Has long been the leading sour cherry of its season. Tree of medium size and bears heavy crops when it is young. The tree thrives well in a wide range of soil and climatic conditions. June.

MONTMORENCY. This is the most popular sour cherry grown in America. Vigorous, productive and fine quality.

CHAMPION'S PLUM TREES

ARE HIGHEST IN QUALITY

PRICES OF PRUNE, PLUM, NECTARINE,
AND APRICOT TREES

	1-9	10-49	50 up
5 to 6 ft., 1 1/16"	\$2.25	\$1.85	\$1.50
4 to 5 ft., 3/16"	1.95	1.65	1.30
3 to 4 ft., 1/16"	1.75	1.45	1.10

ABUNDANCE. (OR.). Medium sized red, with yellow juicy tender flesh. Tree large and hardy, ripening in August.

BURBANK. (OR.). Large red fruit on a hardy and productive tree in late August.

BRADSHAW. A very large dark violet red fruit which is excellent for market and shipping. August.

GREEN GAGE

NECTARINES

A smooth-skinned Plum-Peach. Tree grows like Peach. Fruit looks like large Plum. The flavor, both Peach and Plum.

GOLDMINE. A freestone ripening with Elberta, medium in size with good quality, and very attractive yellow flesh.

NOTE — Most American and European Plums seem to be self-fertile and produce fruit on their own pollen, but produce better when interplanted with other varieties.

Oriental varieties have been found to be self unfruitful and should always be interplanted at all times. Abundance is considered one of the general pollinizers.

GREEN GAGE. (Reine Claude). Large round greenish yellow, excellent for canning, one of the best varieties. Very productive. September.

LOMBARD. Fruits medium to large, dark red very attractive and tempting to the eye, and readily saleable. A very profitable market sort. August.

MONARCH. Large deep purplish blue, tree bears young and yields abundantly. A perfect freestone. October.

SHROPSHIRE DAMSON. Tree is a great producer bearing large crops of good dark purple plums year after year. Fine for canning and a good market plum. Oct.

YELLOW EGG. Golden yellow with thick bloom. Flesh yellow and juicy. A very large and beautiful plum, fine for local market. September.

PRUNES

ITALIAN PRUNE, (Fellenburg). The fruit is fine flavored whether eaten out of hand, prepared for the table or cured as a prune. Fruits very large purplish black with very thick bloom. September.

STANLEY PRUNE. Ripens about September 10th. A medium to large blue prune-type plum; flesh is greenish yellow. Juicy, firm and of good quality. Stone is free. Trees bear very young.

APRICOTS

Popular In All Sections Where
Peaches Do Well

HUNGARIAN. Grows to an immense size, the fruit large and of a good quality, beautifully colored a deep yellow, with yellow flesh, and a very fine flavor. Will bear the best of any sort in the northeastern section of the United States.

QUINCES

CHAMPION. A very large late ripening quince, very productive with flesh almost as tender as an apple.

ORANGE. Fine old variety, large, round, bright yellow, with excellent flavor. October.

	1-9	10-49
4 to 5 ft.	\$2.25	\$1.85

2 to 3 ft.	1.75	1.45

STRAWBERRIES

AN EARLY PROFIT MAKER EVERBEARING VARIETIES

NEW STREAMLINER We have watched this new outstanding variety here at Perry and can hardly think of anything good enough to describe it. It most certainly surpasses any other variety that we have had the opportunity of watching. Last spring we planted a test plot of 500 plants and soon after planting we started picking and from then on throughout this past season we picked from 10 to 12 quarts each week and they were still loaded with berries when we received our first killing frost. The fruit is of enormous size, nearly round in shape, brilliant red in color, and with a delicious honey sweet flavor. Our supply is somewhat limited and if you desire to try some of these fine berries place your order early.

GEM Surpasses other Everbearing varieties in that it thrives in all soils and throws out plenty of "runner plants" thus making a heavy fruiting row which begins to bear fruit six months after planting. Gem berries are all well rounded in shape, a striking red in color, seeds are few and the flavor is outstanding — sweet and juicy — lacking the acidity of most other everbearers.

STANDARD STRAWBERRY VARIETIES

DORSETT

THE BERRY SUPREME

Proving an Ideal Berry, Combining Vigorousness
Productiveness and Quality.

Released for introduction by the U. S. Department of Agriculture spring of 1938. The Dorsett surely makes a worthy companion for the Fairfax as each of them seem to have their advantages. The foliage of Dorsett is not as vigorous as Fairfax but equally as resistant to disease. The foliage and fruiting stems are more erect than Premier and it is a free plant maker. The fruit is usually conic in shape. The color is bright red similar to Blakemore. The berries will average much larger than Blakemore although not quite so large as Fairfax. The flavor of Dorsett is not equal to Fairfax but superior to other early berries.

CATSKILL

A fine, vigorous plant, producing exceptionally large, bright red berries. Begins ripening mid-season, but crop is so large and borne over such a long period that Catskill will still be producing nice berries when some later kinds are nearly gone.

FAIRFAX

Released for introduction by the U. S. Department of Agriculture spring of 1933. It has proved all that has been claimed for it and no grower of strawberries can afford to be without it. The foliage and fruit stems extend well above the ground which tends to give clean fruit and make the fruit more uniform. The Fairfax ripens about the same time as Premier, and its fruiting season extends over a long period. The quality of the Fairfax is equal to the best of our older varieties. The berries are large to very large, of a bright red color at picking time. Like the Bellmar it turns dark after being picked for several days but retains its flavor and firmness.

\$1.15	\$1.75	\$2.80	\$5.60	\$8.75	\$15.00

PREMIER

No strawberry ever introduced has brought the returns to the grower that the Premier has, and it still stands unchallenged as a real money-maker. It has a record very hard to equal as an early market berry, and we cannot say too many good things about it. Consider these important facts about Premier and you can readily understand why we say this about it. Until the introduction of the Blakemore it had no equal as a variety that would adapt itself to most all soil and climatic conditions, whether the soil was sandy, clay, loam or rocky, whether it was planted in North Carolina, Mass., or Ill., you always had an abundance of new plants that were thrifty and disease free. The land did not have to be rich. Of course, it will do better on good soils, but even on comparatively poor soil Premier always makes a showing for you. It can be considered almost frost-proof. It has never failed in a crop in this section since it was introduced. The berries average large and hold up well under heavy crops and unfavorable seasonable conditions; it ripens over a comparatively long period, from two to three weeks; the berries have an attractive bright red color and unusual quality that is surpassed by Chesapeake and possibly Red Gold. It is moderately firm and will carry well to markets up to three hundred miles and farther if handled properly. It is the best of the tried and proven early varieties.

THE NEW RED RHUBARBS

EARLY PRODUCTION — LONG MARKET SEASON
FAIR PRICES — GOOD NET PROFITS RECOMMEND
RHUBARB TO EVERY MARKET GROWER

CANADA RED

This splendid type Rhubarb as developed is rapidly becoming a favorite of all the RED types of Rhubarb. Prices for Large No. 1 Divisions:

Each	5	10
\$. 75	\$3.50	\$6.00

CHAMPION'S RED

A market growers choice.

Our stock seed plants are carefully selected and protected against cross pollenization from inferior strains to assure you of getting large, well colored rhubarb from the plants we sell.

Strong 1 yr. whole roots, 1/2 to 1" caliper.

1-9 \$.25 each; 10-49 \$.20 each

MCDONALD RED

This fine New RED TYPE RHUBARB originating in Canada is generally recognized as one of the best of RED RHUBARBS now offered.

Each	5	10
\$. 75	\$3.50	\$6.00

WASHINGTON ASPARAGUS

Prices per	25	50	100	250	500	750	1000
2 yr., No. 1	\$2.05	\$3.35	\$5.40	\$10.80	\$16.90	\$22.30	\$27.00

We advise that you plant the rust-resistant varieties known as Washington, for they have proven the most profitable. They are the best for either home or commerical planting. A well cared for Asparagus bed of a few thousand plants can always be depended on to bring you a good return and bring you money when you need it during the early spring months.

MARY WASHINGTON

This is considered one of the best Washington kinds of Asparagus. It starts early and produces a heavy crop of very large, tender asparagus. Green in color, and very good quality.

GOOSEBERRIES

2 yr., No. 1 — Each 80c; 10 to 49, each 70c

DOWNING. Fruit is large, handsome pale green and of highest quality. Bush is a good grower.

RED JACKET. Large size with red berries of good quality.

CURRANTS

2 yr., No. 1 — 1 to 9, each 70c; 10 to 49, each 55c

WILDER. The bush is a strong grower, the fruit is large, red and a good keeper and long shipper.

RED LAKE. Originated in Minnesota. It has been well tested and should prove a success in all sections. The berry is very large and a bright red. A heavy yielder and should stand at the top.

BLACKBERRIES

No. 1 — 10 for \$1.75; 100 for \$9.75

BLOWER. This berry is claimed to be the hardiest, most productive and finest quality and commands the highest price. The berry is jet black, an excellent shipper.

ELDORADO. This is one of the most valuable berries for market and home use, being very large, sweet, and having no hard core.

RUBY RED

Another new red Rhubarb introduced from Canada. The stalks are intensely red as the name implies—even the inside of the stalk is red. Rhubarb sauce made from Ruby is as red as Strawberry sauce. The skin is so tender it can be cooked with the stalk.

Each	5	10
\$. 75	\$3.50	\$6.00

BOYSENBERRY

NEW! SENSATIONAL

We offer it again this year because of the tremendous large size of the berries; because of its very prolific fruits; and lastly, because we think that it has the highest qualities of all bramble fruits.

CHAMPION'S RASPBERRY PLANTS ARE ALWAYS A SAFE INVESTMENT

PLANT **SUNRISE**

FOR HOME OR FOR MARKET

No. 1 — 10 for \$2.25; 25 for \$4.10
100 for \$12.35; 500 for \$43.10; 1000 for \$75.00

The color is bright red but turns dark red on ripening. They are firm, fine textured, juicy, non-crumby, mild sub-acid in flavor with a good Raspberry aroma, and better in quality than Latham.

Official records of picking dates show **SUNRISE** to be 10 to 16 days earlier than Latham.

LATHAM

No. 1 — 10 for \$2.25; 25 for \$4.10
100 for \$12.35; 500 for \$43.10; 1000 for \$75.00

Tremendously Productive; Large Berries. Latham is a tall, vigorous grower, the canes are extra heavy, well able to support the load of fruit. The foliage is healthy, dark green, tough and leathery, highly resistant to insects. The berries are beauties and will cause a sensation wherever they are shown. Many are over an inch in diameter and they hold this size to the end of the season. Color dark rich red.

EVERBEARING

No. 1 — 10 for \$2.25; 25 for \$4.10
100 for \$12.35; 500 for \$43.10; 1000 for \$75.00
INDIAN SUMMER. Indian Summer seems to be meeting with general favor. The berries are much larger than other so-called ever-bearing raspberries, roundish, conical, medium red, slightly crumbly and of excellent quality. The summer crop ripens very early; the autumn crop from September on to frost. Plants are hardy, vigorous, about medium height, and bear heavy crops.

REGISTERED **BLACK RASPBERRIES**

For the first time we can supply **REGISTERED BLACK RASPBERRY PLANTS.** These plants are grown and **REGISTERED** by the Ohio Small Fruit Improvement Association, Inc.

Given proper isolation from outside disease sources and given proper cultural care **REGISTERED PLANTS** will produce for you a healthy, high yielding raspberry plantation

which will remain profitable for 8 to 10 years. You will not need to start a new patch every 2-4 years. Raspberries are now a very profitable crop if you start right with **REGISTERED PLANTS.**

BRISTOL. A new variety which is among the best. A heavy yielder of attractive high quality berries. The bushes are hardy and vigorous with the crop ripening just ahead of Cumberland.

CUMBERLAND. Black, large and productive, firm and a good shipper. Mid-season.

NEW LOGAN. Earlier than Cumberland and picks heavier over a short season. Resistant to drouth and will often produce a crop when other varieties fail. It is also somewhat disease resistant.

BLACK RASPBERRIES PRICES

10	25	50	100	500	1000
\$1.80	\$3.30	\$5.70	\$9.90	\$34.50	\$60.00

NUT TREES

ENGLISH WALNUT. In 1915, H. J. Champion the founder of this business, planted several small English Walnut trees around the house in which he lived. In a relatively short time these trees came into bearing and to-day are large shapely trees bearing annually a goodly amount of nuts which are of good size, thin shell, and of unusually good flavor and quality.

2-3 ft. \$2.00 each; 3 for \$5.00

NEW CHINESE CHESTNUT

Several years ago chestnut blight destroyed our native chestnut. Since that time the U. S. Department of Agriculture has been searching for a blight resistant strain. After many tests it was found that a type of Chinese Chestnut was not only blight resistant but an early bearer of large, good quality nuts.

18-24 inch \$1.75; 3 for \$4.50

GRAPE VINES

PLANTERS: When planting a vineyard be sure to get our Special Quantity Prices.

AGAWAM. Very large with thick skin and sweet flavor. Red.

BRIGHTON. Large of good flavor. A fine early red grape.

CACO. Fruit very large in handsome complete bunches, a rich wine-red over amber, very large bearer. Its flavor is sweet and distinctive.

CATAWBA. When fully ripe they are a large dark copper colored fruit, which requires a long season.

CONCORD. The standard blue grape and probably the most extensively grown grape in the U. S. When fully ripe is almost black.

DELAWARE. The old fashioned small red dessert grape, but is unexcelled for flavor either of the grape or juice.

FREDONIA. A new productive, very black grape, ripening with Portland. The bunch and berry are large with excellent flavor, and ripens about ten days ahead of Moore's Early and is an excellent shipper as it does not crack. This grape fills a long-felt need. A juicy, delicious black grape on a vigorous and productive vine.

MOORE'S EARLY. Clusters of medium sized berries, large and black, very hardy and ripens early.

NIAGARA. Clusters of large and handsome pale yellow berries. It ripens with Concord and is the best white grape for the home market.

WORDEN. Large bunches of fine quality black berries which ripen a few days ahead of Concord.

PORTLAND. A new white grape developed in Fredonia, N. Y. Ripens earlier than any other known grape, which permits its being grown over a wide range of territory. The berries are large and have that beautiful yellowish color like Niagara. It has all of the good qualities that a grape should have. The quality is excellent and it is equal to the Niagara and other large grapes. It contains much sugar and can be eaten before fully ripe. The vine is very hardy and highly productive. I wish to assure you that I believe it is well worth your time to try this variety, as I am sure that you will be pleased with Portland.

PORTLAND
The New Large White Grape

SEEDLESS CONCORD

A new grape that is fast proving a favorite with the home owner. Of high quality being excellent when eaten out of hand. The home garden is not complete without this outstanding grape. **\$1.00 each; 3 for \$2.75.**

GOLDEN MUSCAT

This comparatively new variety requires a season fully as long as Concord, but deserves a good trial wherever it has a possible chance to ripen. Valuable for home use and roadside market. The berries are large and meaty, having very few seeds, usually one or two, which are easily separated from the pulp. It makes a large, pyramidal, compact, well-filled cluster. **\$1.00 ea.; 3 for \$2.75.**

STANDARD GRAPE VINE PRICES

2 yr., No. 1 60c ea.; \$4.50 per 10; \$22.50 per 100
1 yr., No. 1 50c ea.; \$3.60 per 10; \$18.00 per 100

SEEDS

FOR THE MARKET
AND HOME GARDENER

We are distributors for Ferry-Morse Seeds. We are able to supply many varieties which we do not list. We can also supply seeds in packets or in 100 pound lots. We try to supply a top quality seed at a fair price. **ATTENTION, MARKET GARDENERS:** Send us the list of seeds you want to plant and we will quote special prices.

BEANS - DWARF OR BUSH WAX

PENCIL POD WAX. 55 Days. Pods are handsome light yellow, very fleshy, brittle, stringless, and of unexcelled quality. Plant large and thrifty and heavily productive over a long period.

Pkt. 10c; ½ Lb. 35c; Lb. 50c; 2 Lbs. \$.75; 10 Lbs. \$3.20

FERRY'S GOLDEN WAX. 48 Days. A splendid early home garden variety. Golden yellow, thick, oval, fleshy, brittle, stringless.

Pkt. 10c; ½ Lb. 35c; Lb. 50c; 2 Lbs. \$.75; 10 Lbs. \$3.20

GREEN PODDED BUSH BEANS

GIANT STRINGLESS GREEN POD. 53 Days. Standard variety used in home and market gardens also for canning and freezing. Pods medium green, round, very fleshy with marked indentation between seeds. Brittle and stringless. Seeds glossy yellowish brown.

Pkt. 10c; ½ Lb. 30c; Lb. 50c; 2 Lbs. 90c; 15 Lbs. \$5.20

TENDERGREEN. 54 Days. An outstanding general purpose variety for market gardens, home gardens, canning and freezing. Pods long, round, straight, stringless and of fine quality. Plant erect, vigorous growing, and very productive. Seeds brown, mottled with light fawn.

Pkt. 10c; ½ Lb. 30c; Lb. 50c; 2 Lbs. 90c; 15 Lbs. \$5.50

POLE OR RUNNING BEANS

KENTUCKY WONDER. 65 Days. Pods long, slightly curved and twisted, round and heavily indented. Very fleshy and slightly stringy. A good climber.

Pkt. 10c; ½ Lb. 35c; Lb. 60c; 2 Lbs. 90c

BEANS - BUSH LIMA

HENDERSON'S BUSH LIMA (Baby Lima). 65 Days. Extensively used by canners, and popular as an early home garden variety. Pods short, flat, containing 3 to 4 small oval beans. Green shell beans of excellent quality. Plant medium size, heavily productive, seed small, flat and white.

Pkt 10c; ½ Lb. 35c; Lb. 60c; 2 Lbs. 90c;
15 Lbs. \$5.20

FORDHOOK BUSH LIMA. 75 Days. The standard market garden and shipping variety. Also highly recommended for freezing. Pods medium green, thick, plump, and straight containing 3 to 4 beans of highest quality. Plant large erect, heavily productive.

Pkt. 10c; ½ Lb. 35c; Lb. 60c; 2 Lbs. \$1.00;
10 Lbs. \$4.00

Tendergreen Bush Beans

LIMAS — POLE

FLORIDA BUTTER, SPECKLED. 85 Days. Popular and dependable variety largely used in the south. Stands drought and heat better than most kinds. Pods borne in clusters, usually 3 beans to the pod. Vines with glossy dark green leaves, vigorous and very productive. Seeds small, oval, flat, buff spotted or splashed with maroon to almost black.

Pkt 10c; ½ Lb. 35c; Lb. 60c; 2 Lbs. 90c;
10 Lbs. \$4.00

BEETS

DETROIT DARK RED. 60 Days. This is the original strain of this popular variety. Roots globe shaped, symmetrical, and with small collar and tap root. Interior color deep blood red. Retains its excellent quality until roots are fully grown. Equally desirable for canning, home and market.

Pkt. 10c; Oz. 20c; ½Lb. 85c; Lb. \$1.50

BROCCOLI

DeCICCO. 60 Days. An extremely early strain producing large heads ready for market 10 days to two weeks quicker than other varieties. It furnishes a large percentage of side shoots or sprouts excellent for bunching or for freezing. Plants medium tall, light green in color and very productive. Our stock of this strain has been carefully selected, and can be highly recommended as the earliest maturing strain of Broccoli obtainable.

Pkt. 10c; ½ Oz. 45c; Oz. 80c; ¼ Lb. \$2.40; Lb. \$8.00

ITALIAN GREEN SPROUTING, EARLY STRAIN. 70 Days. Vigorous early type, forming large compact central heads and very few laterals. First heads are ready for market in about 70 days from planting under favorable conditions, when the seed is planted in the open. Transplanting usually delays maturity about one week.

Pkt 10c; ½ Oz. 35c; Oz. 60c; ¼ Lb. \$2.00 Lb. \$6.00

CABBAGE

COPENHAGEN MARKET. 66 Days. Our stock of this variety is the extra early strain. Splendid for early market. Plant small, compact, stem short, heads uniformly round, firm, usually 6 to 7 inches in diameter, and weigh 3 to 3½ pounds. Interior clear white and of excellent quality.

Pkt. 10c; Oz. 60c; ¼ Lb. \$1.80

Chihli Chinese Cabbage

Detroit Dark Red Beet

CABBAGE CONTINUED

JERSEY QUEEN (Yellows resistant). 62 Days. Extremely early variety very valuable for home and market garden as well as for shipping. Exceptionally resistant to yellows. The first of the resistant strains to mature.

Pkt. 10c; Oz. 70c; ¼ Lb. \$2.00

FERRY'S ROUND DUTCH. 71 Days. Splendid for home and market garden. Plants small and compact. Stem short. Heads almost ball-shaped, commonly 7 to 8 inches in diameter, 6 inches deep and weigh 4½ to 5 pounds, firm and of high quality.

Pkt. 10c; Oz. 90c; ¼ Lb. \$2.50

MARION MARKET (yellows resistant). 75 Days. Yellows resistant strain of Copenhagen market. Larger and coarser in plant, and not so early nor so uniform as the original strain, but with the round head and crisp tenderness of the parent cabbage. Will produce a normal crop on yellows infested soil where non-resistant strains fail completely.

Pkt. 10c; Oz. 70c; ¼ Lb. \$2.00

WISCONSIN ALL SEASON (yellows resistant). 90 Days. Very valuable as a substitute for the regular All Seasons in infested localities. Chiefly used for kraut; also valuable for winter keeping. Heads large, commonly 10 to 12 inches across, 8 inches deep and weigh 9 to 10 pounds.

Pkt. 10c; Oz. 70c; ¼ Lb. \$2.00

FERRY'S PREMIUM LATE FLAT DUTCH. 100 Days. A very large late cabbage, popular for home and market garden, and for fall shipment; a good keeper. Heads very large and flat, but deep.

Pkt. 10c; Oz. 60c; ¼ Lb. \$1.50

ROUND RED DUTCH. 80 Days (medium early). Recommended for shipping, heads round, solid, about 6 inches in diameter, and weigh 3 to 5 pounds. Deep red.

Pkt. 10c; Oz. 70c; ¼ Lb. \$2.00

CHINESE CABBAGE

CHIH LI. 70 Days. Early and very sure heading, heads become 18 to 20 inches tall, 3½ to 4 inches thick, tapered near the tip, very firm, well blanched, crisp, tender, and sweet.

Pkt. 10c; Oz. 45c

Chantenay
Red Cored

CARROT

CHANTENAY RED CORED. 70 Days. This is a distinct improvement over the well-known Chantenay especially in color, texture, and quality of flesh and has been accepted with much enthusiasm. Roots deep reddish orange, 5½ to 6 inches long, 2¼ inches thick at the shoulder, tapered stump-rooted, core reddish orange almost the same color as the flesh and so inconspicuous as to make the term coreless seem appropriate; flesh fine grained and tender of sweet delicate flavor.

Pkt. 10c; Oz. 35c; ¼ Lb. 50c; Lb. \$1.65

DANVERS HALF LONG. 75 Days. Very productive and popular for home and market garden. Roots bright deep orange, 6 to 7 inches long, 1¾ inches thick, uniformly tapered to the blunt end. Flesh bright orange, crisp and tender. Suitable for bunching or bushel carrots.

Pkt. 10c; Oz. 35c; ¼ Lb. 50c; Lb. \$1.65

TOUCHON. Tops of medium height and strong. Roots orange scarlet, 6½ to 7½ inches by 1¼ to 1½ inches. Straight strictly stump rooted. Flesh deep orange with inconspicuous core.

Pkt. 10c; Oz. 40c; ¼ Lb. 75c; Lb. \$2.50

NANTES. 68 Days. Stump rooted. Particularly desirable for frame culture and one of the best for home garden and early market. Tops small, roots bright orange, 6 to 7 inches long, 1¼ thick, cylindrical; stump rooted. Flesh bright orange, of highest quality, core inconspicuous, similar to much that is offered under the term coreless.

Pkt. 10c; Oz. 40c; ¼ Lb. 75c; Lb. \$2.50

SWISS CHARD

LUCULLUS. 60 Days. The fleshy crumpled leaves of this variety make very choice greens. Plant is erect, stems rounded and finely ribbed, foliage rich dark green.

Pkt. 10c; Oz. 25c

CELERY

GIANT PASCAL. A tall late green celery of excellent quality, stalks round, thick and solid.

Pkt. 10c; Oz. 70c

TALL NON - BOLTING GOLDEN PLUME. 90 Days. This strain grows taller and faster than the original strain introduced some years ago. Its ability to withstand low temperature without bolting make it the most satisfactory of the Golden Plume strains for growing under certain unfavorable conditions. 8½ to 9 inches to the joint; 26 to 27 inches overall height.

Pkt. 10c; Oz. 70c

Giant
Pascal
Celery

CAULIFLOWER

EARLY SNOWBALL. 55 Days. Selected as the most satisfactory early strain of snowball cauliflower. Plants of medium height with rather waved and crumpled leaves which bend outward at the tips. Inner leaves cover the head well. Heads of good depth, solid, Ivory white, and of fine quality. Early and very even in time of maturity.

Pkt. 10c; ¼ Oz. 45c; Oz. \$1.50

Early Snowball

SWEET CORN**HYBRID YELLOW**

GOLDEN CROSS BANTAM P51X39. 88 Days. The leading and most widely used variety of hybrid sweet corn. Normally it matures 8 to 10 days later than Golden Bantam. 10 to 14 rowed. Stalks sturdy and productive. Better adapted for growing under more varied conditions and less susceptible to Stewarts Disease than other varieties in its class.

Pkt. 10c; ½ Lb. 30c; Lb. 50c; 2 Lbs. 90c; 10 Lbs. \$4.00

IOANA 1P39X1-45. 87 Days. A very desirable main crop variety which matures slightly later than Golden Cross Bantam. Plants sturdy and vigorous growing with broad numerous leaves. Foliage heavier than Golden Cross Bantam. Ears 12 to 14 rowed, cylindrical, well filled with medium narrow, light yellow kernels. Highly resistant to drought and bacterial wilt. Excellent canning and market garden variety.

Pkt. 10c; ½ Lb. 30c; Lb. 50c; 2 Lbs. 90c; 10 Lbs. \$4.00

MARCROSS C13X6. 72 Days. Early maturing with medium yellow kernels. Plants highly resistant to bacterial wilt.

Pkt. 10c; ½ Lb. 30c; Lb. 50c; 2 Lbs. 90c; 10 Lbs. \$4.00

SWEET CORN — OPEN POLLINATED
White

COUNTRY GENTLEMAN. 100 Days. Heavy yielding with evergreen character. Valuable for home, market garden and especially for canning. Set solid with irregular rows of kernels. These are white, shoe peg form, very deep sweet and tender.

Pkt. 10c; ½ Lb. 20c; Lb. 30c; 10 Lbs. \$2.50

STOWELLS EVERGREEN. 100 Days. Standard late variety very valuable for canning, and much grown for market. Ears 14 to 20 rowed, kernels deep white sweet and tender and remain in table condition for a long time.

Pkt. 10c; ½ Lb. 20c; Lb. 30c; 10 Lbs. \$2.50

Yellow

GOLDEN BANTAM. 78 Days. The best strain of the early original type of golden bantam. Plants very productive commonly bearing two ears. Ears strictly 8 rowed, very uniform. Kernels rich golden yellow, very tender, sweet and of splendid rich flavor.

Pkt. 10c; ½ Lb. 20c; Lb. 30c; 10 Lbs. \$2.50

POPCORN

WHITE RICE. 110 Days. Early. - Kernels translucent waxy white; pointed. Kernels large and snow white when popped.

Pkt. 10c; ½ Lb. 25c; Lb. 45c; 10 Lbs. \$2.85

SOUTH AMERICAN. 110 Days. Large yellow kernels which pop to enormous size without hard centers.

Pkt. 10c; ½ Lb. 25c; Lb. 45c; 10 Lbs. \$2.85

EGG PLANT

FORT MYERS MARKET. 85 Days. Vigorous and very productive high bush variety, holding fruits well off the ground. Fruits ideal size, 9 to 10 inches long, 5½ to 6½ inches in diameter, nearly egg shaped, broadest near blossom end. Outstanding for deep purplish black color.

Pkt. 10c; Oz. \$1.00; ¼ Lb. \$3.00

Marcross

CUCUMBER

A AND C OR COLORADO. 68 Days. An outstanding variety for shipping on account of its deep green color. Fruits slightly tapered at neck and moderately pointed but fairly straight and symmetrical.

Pkt. 10c; Oz. 25c; ¼ Lb. 75c; Lb. \$2.35

CHICAGO PICKLING. 60 Days. Valuable pickling and slicing variety. Fruits medium green; black spined 6 to 7 inches long; 2½ inches thick; taper slightly toward each end very uniform.

Pkt. 10c; Oz. 25c; ¼ Lb. 75c; Lb. \$2.35

IMPROVED LONG GREEN. 68 Days. Excellent home garden variety. Fruits ten to 12 inches long, medium dark green, black spined, very desirable for slicing.

Pkt. 10c; Oz. 25c; ¼ Lb. 75c; Lb. \$2.35

NATIONAL PICKLING. 54 Days. A particularly uniform and valuable black spined variety, for production of high grade small pickles. Fruits straight, symmetrical, full at the ends.

Pkt. 10c; Oz. 25c; ¼ Lb. 75c; Lb. \$2.35

ENDIVE

FULL HEART BATAVIAN. 90 Days. Distinctly improved form of broad leaved Batavian. Plant medium large with very deep, full, compact, well-blanching heart of unfolded broad leaves, that are of thick buttery texture.

Pkt. 10c; Oz. 35c; ¼ Lb. 80c

Black Seeded Simpson Lettuce

LETTUCE

ICEBERG (Giant Crystal Head). 82 Days. Very popular for nearby and home market. Plant large with broad crisp, wavy light green leaves, tinged brown on margins. Head large, well folded, white inside, crisp, very sweet and tender. Must not be confused with New York which is commonly called Iceberg by shippers and green grocers.

Pkt. 10c; Oz. 25c; ¼ Lb. 75c; Lb. \$2.75

LOOSE LEAVED VARIETIES

BLACK SEEDED SIMPSON. 45 Days. Early Dependable in all parts of America, and widely grown in home and market gardens. Plant large attractive, compact, with broad, frilled light green leaves that are of fine crisp texture and splendid quality.

Pkt. 10c; Oz. 20c; ¼ Lb. 50c; Lb. \$1.50

Hale's Best

LETTUCE (Continued)

GRAND RAPIDS. 42 Days. Very early. Hardy, disease resistant, the most widely used and best adapted variety for greenhouse forcing. Plants large upright, compact and handsome, bright solid light green. Leaves large and broad, margin much waved and frilled, very tender and sweet when grown under glass.

Pkt. 10c; Oz. 20c; ¼ Lb. 50c;
Lb. \$1.50

MUSKMELON & CANTALOUPE

HALE'S BEST (original strain). 86 Days. The earliest shipping melon of outstanding merit, for home and garden market. Fruits oval, 6½ inches long, 5½ inches in diameter. Ribbing distinct covered with heavy netting. Flesh thick, salmon orange, sweet aromatic flavor.

Pkt. 10c; Oz. 25c; ¼ Lb. 70c; Lb. \$2.20

HEARTS OF GOLD (large type). Standard shipping melon, flesh very thick, deep salmon orange. Fine grained, sweet and juicy.

Pkt. 10c; Oz. 25c; ¼ Lb. 70c; Lb. \$2.20

HONEY ROCK or SUGAR ROCK. 85 Days. Newly developed, somewhat variable, early variety increasing in popularity among market gardeners and shippers. Fruits 5 to 6 inches in diameter, round to slightly flattened, coarsely netted, rind very strong, flesh medium thick, deep salmon color, juicy, and of a sweet musky flavor. Very little loss of fruits due to growth cracks during the ripening season.

Pkt. 10c; Oz. 25c; ¼ Lb. 70c; Lb. \$2.20

IROQUOIS. 90 Days. This new melon developed by Cornell University has definite resistance to Fusarium wilt. Fruits are round to oval, about 6½ inches in diameter, with prominent ribs, and good netting, the rind is tough and holds up well. Flesh is deep orange color, of fine texture and excellent quality. Skin creamy green at maturity.

Pkt. 5c; Oz. 40c; ¼ Lb. \$1.00; Lb. \$3.00

PRIDE OF WISCONSIN. Similar in size and shape to Honey Rock. Oval in shape with tough heavily netted rind. Flesh deep orange and very thick. Sweet and of excellent quality.

Pkt. 10c; Oz. 25c; ¼ Lb. 70c; Lb. \$2.20

WATERMELON

HARRIS' EARLIEST. 80 Days. The best extremely early variety; very popular in northern sections. Fruits medium size, broad oval, dark green stripes, alternate with lighter, rind brittle, flesh bright red, of good quality, seeds blackish.

Pkt. 10c; Oz. 25c; ¼ Lb. 75c; Lb. \$2.10

TOM WATSON. 95 Days. The most widely grown melon for shipping, also popular for home and market garden use. Fruits very large, oblong, cylindrical, symmetrical dark green with fine veining of very dark green, rind very tough, flesh bright deep red, crisp and sweet, seeds vary in color from brown to almost white.

Pkt. 10c; Oz. 25c; ¼ Lb. 75c; Lb. \$2.10

WONDER (improved Kleckley's Sweet). 85 Days. Comparatively new. Useful for home and near-by markets, but tender rind makes it unsuitable for long distance shipping. Large dark green oblong fruits, often 22 inches long. Flesh rich red, sweet, and fine textured. Seeds white.

Pkt. 10c; Oz. 25c; ¼ Lb. 75c; Lb. \$2.10

ONION

BRIGHAM YELLOW GLOBE. 110 Days. A strain of southport yellow globe, selected to produce bulbs with slightly deeper skin color. Very solid, globe shaped. Preferred by many growers because of its fine keeping qualities.

Pkt. 10c; Oz. 60c; ¼ Lb. \$1.50; Lb. \$4.00

Brigham Yellow Globe

California Wonder Pepper

ONION (Continued)

EVERGREEN BUNCHING (hardy white bunching). 60 Days. A very profitable home and market garden variety, for young or bunching onions. Produces a cluster of 4 to 6 useful shoots from a single seed the first season. Winters over well where weather is not too severe and provides a heavy crop for early harvest, if planted in mid summer.

Pkt. 10c; Oz. 60c; ¼ Lb. \$1.50; Lb. \$4.00

SWEET SPANISH UTAH. 115 Days. The best of the very large mild varieties. One of the original Spanish types, but a better keeper because it was selected for keeping qualities. Deep amber orange, small neck globular.

Pkt. 10c; Oz. 80c; ¼ Lb. \$1.75; Lb. \$5.50

PEPPER

CALIFORNIA WONDER. 72 Days. (sweet). Large green fruits available very early. This is the standard of excellence in sweet peppers. Plant thrifty, upright, heavily productive over a long season. Fruits handsome, very large, very smooth and regular, commonly 4½ inches long and 3½ inches through. Dark green becoming bright crimson. Flesh extremely thick and firm. Sweet throughout and of distinct flavor.

Pkt. 10c; ½ Oz. 40c; Oz. 75c; ¼ Lb. \$2.25

OAKVIEW WONDER. 63 Days. (Sweet). An earlier and more productive strain of California Wonder developed by line breeding at the Oakview Seed breeding station. Fruits blocky, smooth, with thick, mild, sweet flesh. Plants shorter and stockier than California Wonder but fruits are set earlier and more abundantly. An outstanding strain unsurpassed.

Pkt. 10c; ½ Oz. 45c; Oz. 80c; ¼ Lb. \$2.45

SWEET YELLOW. Golden yellow skin and meat sweet and mild.

Pkt. 10c; ½ Oz. 45c; Oz. 80c; ¼ Lb. \$2.45

PARSLEY

EXTRA TRIPLE CURLED (moss curled). 75 Days. Plant compact, leaves dark green, and so finely cut and closely curled as to resemble tufts of moss. Aside from its value for flavoring and garnishing the plant is decorative. Tall, light green and very productive.

Pkt. 10c; Oz. 15c; ½ Lb. 45c; Lb. \$1.20

PARSNIP

HOLLOW CROWN, THICK SHOULDER. 130 Days. An improved strain of hollow crown or Guernsey. The standard sort for home or market gardens. Roots 12 to 15 inches long, 3 inches wide at the shoulder tapering gradually to the tip.

Pkt. 10c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.25

PEAS

ALASKA, WILT RESISTANT. 58 Days. An extremely early variety widely grown for canning purposes. Also used by market gardeners where earliness is the first consideration. Vines slender and light green in color. Very uniform in time of maturity. Pods borne singly, very plump, blunt ended. Seeds small round, medium green with bluish cast. This strain has now replaced the original type of Alaska as it has all of the good qualities of the parent stock and in addition is fully resistant to fusarium wilt.

Pkt. 10c; Lb. 25c; 10 Lbs. \$2.20

LAXTONIAN. 60 Days. Vines dark green, pods borne singly; dark green; plump; tapered at the tip. Seeds large wrinkled; cream.

Pkt. 10c; Lb. 30c; 10 Lbs. \$2.50

LITTLE MARVEL (improved strain). 64 Days. Our recently improved stock is outstanding, unsurpassed in quality and productiveness, particularly valuable for home garden. Vines dark green, very thrifty. Pods dark green, very plump, straight blunt ended. Seeds medium sized, squarish, distinctly wrinkled, green, interior green.

Pkt. 10c; Lb. 30c; 10 Lbs. \$2.50

PREMIUM GEM. 62 Days. Valuable home garden variety. Vines medium green. Pods medium green, plump, straight, blunt ended. Seeds medium sized; green wrinkled.

Pkt. 10c; Lb. 30c; 10 Lbs. \$2.50

THOMAS LAXTON. 60 Days. Unsurpassed for the home or market garden as an early, large podded pea of high quality. Excellent for shipping and canning and now the most extensively used variety for freezing. Pods borne singly, deep green, plump, broad, blunt ended. Seeds large, wrinkled, cream and green.

Pkt. 10c; Lb. 30c; 10 Lbs. \$2.50

PUMPKIN

LARGE YELLOW or CONNECTICUT FIELD. 120 Days. Standard field pumpkin for pies, canning and stock feed. Fruits very large usually 10 inches long, 12 inches in diameter and weigh 20 pounds — sometimes much larger. Skin smooth, deep orange yellow, shell thin, hard. Flesh thick, coarse, sweet and deep yellow.

Pkt. 10c; Oz. 15c; ¼ Lb. 45c; Lb. \$1.50

SUGAR or NEW ENGLAND PIE. 115 Days. Earliest and best for pies, grown in home and market gardens, and for shipping. Fruits commonly 6 inches long, and 8 to 9 inches in diameter. Flattened, furrowed, skin smooth, rich reddish orange, rind hard, flesh thick, orange yellow, of unexcelled quality.

Pkt. 10c; Oz. 15c; ¼ Lb. 45c; Lb. \$1.50

RADISH

CINCINNATI MARKET. 29 Days. Popular home and market garden sort. Tops short and small. Roots 6 to 7 inches long, ⅝ inch thick, cylindrical, tapered near tip, deep red with purplish tinge. Flesh white, mild crisp.

Pkt. 5c; Oz. 10c; Lb. 90c; 10 Lbs. \$8.00

EARLY SCARLET GLOBE MEDIUM TOP. 23 Days. An excellent strain for general home and market garden. Especially desirable for use out of doors under normal growing conditions. Color rich bright scarlet, flesh white, mild, crisp.

Pkt. 5c; Oz. 10c; Lb. 90c; 10 Lbs. \$8.00

FRENCH BREAKFAST. 25 Days. Standard home and market garden sort, also suitable for forcing. Tops small, roots oblong, blunt, with slender well defined tap root, about 1½ inches long, ⅝ in thru. Rich scarlet with white bottom. Flesh white, crisp, and of splendid quality.

Pkt. 5c; Oz. 10c; Lb. 90c; 10 Lbs. \$8.00

ICICLE. 30 Days. The best early white variety. Particularly popular in home and market gardens. Tops small. Roots long and tapered; very white throughout, brittle as ice, of splendid quality, mild and of splendid flavor.

Pkt. 5c; Oz. 10c; Lb. 90c; 10 Lbs. \$8.00

RUTABAGA

AMERICAN PURPLE TOP or IMPROVED ISLAND. 90 Days. Widely grown for market, for storage and car load shipment. Tops small, neck short, roots large and spherical, deep purplish red above the ground, light yellow below. Tap root small, flesh yellow, fine grained, firm, crisp, mild and sweet.

Pkt. 5c; Oz. 25c; ¼ Lb. 35c; Lb. 90c

SPINACH

NEW ZEALAND (Tetragonia). 55 Days. Distinct from other kinds of spinach, and particularly valuable for culture in hot dry weather. Seeds comparatively large and nut-like. Plants very large and spreading, leaves numerous, small, triangular, thick, deep green. The tender leafy shoots are gathered repeatedly.

Pkt. 10c; Oz. 15c; ¼ Lb. 35c; Lb. \$1.20

SQUASH

BLUE HUBBARD. A good large hubbard with blue shell.

Pkt. 10c; ¼ Lb. 50c; Lb. \$1.75

HUBBARD. 105 Days. The standard winter squash for home, market and shipping. Fruits large commonly 9 to 10 inches thru, globular, dark bronze green, moderately warted, rind very hard and strong, flesh very thick, deep orange yellow, fine grained and dry, of splendid quality.

Pkt. 10c; ¼ Lb. 50c; Lb. \$1.75

TABLE QUEEN (Acorn or Des Moines). 80 Days. Fruits pointed acorn shape. 5½ inches long and 4 inches thru, uniformly ridged, skin smooth, dark green, shell thin, flesh light yellow, bakes dry and sweet.

Pkt. 10c; ¼ Lb. 50c; Lb. \$1.75

TURNIP

PURPLE TOP WHITE GLOBE. (Market Gardener's strain). 55 Days. The standard home, market garden and shipping sort. Tops medium large, compact, cut leaved. Roots globular, smooth, bright purplish red above, white below. Flesh white and firm, fine grained and tender when young.

Pkt. 5c; Oz. 25c; ¼ Lb. 40c; Lb. \$1.00

Warted Hubbard Squash

Marglobe Tomato

TOMATO

EARLIANA. 64 Days. Particularly valuable for home and early market. Our strain is definitely superior in earliness and quality. Fruits medium sized, flattened globe shape, deep scarlet red, firm and smooth.

Pkt. 10c ;Oz. 60c; ¼ Lb. \$2.50; Lb. \$7.50

BONNIE BEST. Bright deep scarlet red, medium large, flattened globe shaped, smooth and firm.

Pkt. 10c ;Oz. 60c; ¼ Lb. \$2.50; Lb. \$7.50

MARGLOBE. 75 Days. Definite disease resistance recommends this variety for use in sections infested with Fusarium wilt and nail-head rust. Plants thrifty and heavily productive with long bearing season. Fruits uniform deep scarlet, large, uniformly globe shaped, smooth, solid.

Pkt. 10c; Oz. 45c; ¼ Lb. \$1.75; Lb. \$6.00

OX HEART. 100 Days. Very popular late home garden variety. Fruits very large often weigh 1 to 2 pounds or more. Heart-shaped, pink, flesh solid with few seeds, of mild flavor, and very choice for salads.

Pkt. 10c; Oz. \$1.20; ¼ Lb. \$4.00

PONDEROSA. (sometimes called Beefsteak). 90 Days. One of the best for home use. Fruits deep purplish pink, extremely large, commonly 9 to 12 ounces each; deep but flat, very fleshy but with few seeds. Very mild non-acid flavor.

Pkt. 10c; Oz. \$1.20; ¼ Lb. \$4.00

STOKESDALE. 70 Days. A second early scarlet fruited variety maturing about a week earlier than Marglobe. Plant rather open in habit, with medium heavy foliage. Fruits large globe or subglobe, smooth and well colored.

Pkt. 10c; Oz. 45c; ¼ Lb. \$1.75; Lb. \$6.00

HARDY SHRUBS

FLOWERING ALMOND

ALMOND. (Flowering Pink). A very attractive shrub in early spring, being in full bloom before its leaves appear. The flowers are small double and light pink and a mass of these in the right spot certainly will draw many well deserved compliments. 2-3 ft. \$1.00 each; 3 for \$2.69.

ROSE OF SHARON

ALTHEA. Blooms late in August and September, with a profusion of large and brightly colored flowers, much like the tender hibiscus in form. Double rose, double white, double purple, double red, blue and single white. 2-3 ft., 85c each; 3 for \$2.39

ARALIA

PENTAPHYLLA. (Five-leafed Aralia). Long, slender, gracefully drooping branches a rich shiny green. Unique among shrubs in that it does not change color. 2-3 ft. 85c each, 3 for \$2.39; 3-4 ft. \$1.00 each, 3 for \$2.69.

BARBERRIES

BERBERIS ATROPURPUREA. (Red Leaf Barberry). A brilliant accent shrub as a solitary specimen or in a close group among duller foliage. This variety starts in its spring foliage a warm bronzy red, the heat of summer bringing out a red brilliancy, with autumn adding other tints to its richness. The abundant scarlet berries persist throughout the winter. A sunny exposure is required for the best color effect. 12-18 in., 45c each; 10 for \$4.00.

BERBERIS THUNBERGI. (Japan Barberry). The ideal low hedge plant, hardy, tough and of compact growth, adapted to shearing. The leaves are a beautiful green in the summer turning to a redish bronze in autumn and being covered with shiny red berries all winter. It is customary to plant about 12 to 15 inches apart for a thick hedge, but 2 feet is close enough where individual expression is desired.

12-18 in. 40c, 10 for \$3.50; 18-24 in. 50c; 10 for \$4.50

BEAUTYBERRY

CALLICARPA PURPUREA. Gracefully curving branches, covered in August with thousands of closely set small pink tinted flowers. These are followed in late September by masses of violet-purple berries which last until mid-winter. 18-24" \$1.00 each, 3 for \$2.69.

BUTTERFLY BUSH

BUDDLEIA, ILLE DE FRANCE. A sensational variety of more uniform compact growth, and great brilliance of color in bloom. The flowers are rosy purple, with a deep violet suffusion. 2 year 85c each, 3 for \$2.39.

BLUE MIST

CARYOPTERIS. This low growing plant is one of the best of the border plants. It is covered from August till frost with many clusters of powdery blue fringed flowers. It attains a height of from 18-24 inches and remains perfectly rounded, making a small mound about two feet in diameter. The foliage is toothed and silvery green in color. It is a gorgeous asset to the flower border or in front of the shrub border.

15-18 inches, \$1.00 each; 3 for \$2.69

CALYCANTHUS

FLORIDUS. (Carolina Allspice). The strong reddish brown shoots are covered with large glossy leaves, from the axils of which spring odd double spicy flowers of chocolate red which are quite fragrant.

18-24 in., 85c each; 3 for \$2.39

CHOKEBERRY

ARONIA ARBUTIFOLIA (Red Chokeberry). It bears an abundance of white flowers in May and its amazing red berries and foliage in the late fall greatly increase its value, carrying well into the winter. Does well in damp location.

2-3 ft. 85c each; 3 for \$2.39

GOLDEN VICARYI

A new outstanding shrub either for specimen planting or for hedging. This is a new hardy, dwarf, bright golden hybrid of Iboya privet with glossy foliage and compact habit.

12-18 in., \$1.00 each; 3 for \$2.75; 10 for \$8.50

Assorted Altheas (Rose of Sharon)

FRUIT GROWERS!

It's easy to grow perfect fruit if you know how. We would like to tell you how it's done and help you solve your fruit problems.

Here are a few things we told our readers in recent issues: Identifying Insect Injuries, The Insecticide DDT for Fruit Insect Control, Identifying Disease Injuries, How to Handle a Picking Crew, How Much Cold Can Fruit Take and How to Identify Varieties.

Do you know what varieties are best to plant? Are you planning to build a cold storage? Are you looking for something new in fruit packages? These questions and many others will be answered in future issues of America's leading fruit magazine, the **AMERICAN FRUIT GROWER**.

No place can you get so much for so little... 36 profusely illustrated issues packed full of timely information for every fruit grower, and for only \$1.00.

Mail the coupon today with your remittance (at our risk) direct to the **AMERICAN FRUIT GROWER**, 1370 Ontario St., Cleveland 13, Ohio.

BEAUTYBUSH

KOLKWITZIA AMABILIS. (Beauty Bush). A charming new shrub with attractive leaves and gracefully arching branches. The beautiful flowers appear in great profusion in June, in pairs which cluster closely in cymes of about twenty five; bell shaped and somewhat lipped, pale pink with orange veins in the throat.

2-3 ft., \$1.00 each; 3 for \$2.69

CHIONANTHUS

VIRGINICA. (White Fringe). A very attractive shrub with large leathery leaves and lace-like white flowers borne in gracefully drooping clusters. Often tree like but usually bushy to the ground.

2-3 ft. \$1.50 each; 3 for \$3.98

CLETHRA

ALNIFOLIA. (Sweet Pepper Bush). A small shrub, very fragrant in August and September, when covered with long snowy wands of creamy white flowers. It is used well in a border close to a house where the fragrance may drift into the house.

2-3 ft. \$1.00 each; 3 for \$2.69

COTONEASTER

DIVARICATA. (Spreading Cotoneaster). This makes a handsome shrub with its graceful spreading habit and in autumn and winter it is covered with bright red fruit.. 18-24 in. \$2.00 each.

DEUTZIA

GRACILIS. (Slender Deutzia). An excellent shrub for border planting and very attractive when covered with its many bead-like buds which open into pure white flowers in June. Two feet.

12-15 in., 65c each; 3 for \$1.75

GRACILIS ROSEA. (Pink Deutzia). Has the same habits as Gracilis but grows a little taller and is covered with rose pink flowers in bloom.

2-3 ft., \$1.00 each; 3 for \$2.69

LEMOINEI. (Lemoine's Deutzia). Medium large flowers of pure white borne in cone shaped heads, attains a height of four feet.

18-24 in., 75c each; 3 for \$2.00

SCABRA. (Pride of Rochester). Grows more bushily and blooms in May before the others. The flowers are large, free and double white.

3-4 ft., 85c each; 3 for \$2.39

DEUTZIA LEMOINE

COTONEASTER DIVARICATA

DOGWOOD

CORNUS ELEGANTISSIMA. (Silver Leaf Variegated Dogwood). Purplish red branches with beautiful silver variegated foliage. A beautiful plant in both summer and winter.

2-3 ft., \$1.00 each; 3 for \$2.69

CORNUS LUTEA. (Yellow Twig Dogwood). A striking yellow branched form of dogwood much used as a contrast.

2-3 ft. 85c each; 3 for \$2.39

CORNUS MASCULA. (Cornelian Cherry). The small button shaped flowers appear in early spring before the leaves, and in the fall the oblong scarlet fruit is very attractive.

3-4 ft. \$1.00 each; 3 for \$2.69

CORNUS SIBERICA. (Coral Dogwood). A useful filling shrub with clusters of fine white flowers, white berries; with branches turning to a blood red in winter.

2-3 ft., 85c each; 3 for \$2.39

EUONYMUS

ALATUS. (Winged Burning Bush). Coarse corky winged branches, leaves turning to crimson in the autumn. Is covered with orange berries in tan hulls which often remain through the winter.

2-3 ft., \$1.00 each; 3 for \$2.69

EUROPEUS. (European Burning Bush). A large shrub with interesting shiny leaves which turn to beautiful reddish shades in the fall. The plants have a great abundance of showy red fruit in the fall.

2-3 ft., \$1.00 each; 3 for \$2.69

FILBERT OR HAZELNUT

CORYLUS AMERICANA. A compact well foliaged shrub which makes a wonderful screen or used well in a shrub planting; also one may enjoy a good supply of filberts. These plants bear young and very heavy year after year.

2-3 ft. 75c each; 3-4 ft. \$1.00 each

FLOWERING QUINCE

CYDONIA JAPONICA. Scarlet flowers early in the spring followed by small quince shaped fruit that is quite fragrant. The foliage is shiny and the growth is dense, making it desirable as a planting specimen.

18-24 in. 85c, each; 3 for \$2.69

GOLDEN CHAIN

LABURNUM VOSSI. The golden chain is a handsome small tree with dark green leaves falling late in autumn without change of color. It has drooping racemes of bright yellow flowers in late spring, followed by long narrow pods which remain on the tree a long time.

3-4 ft., \$2.00 each; 3 for \$5.00

FORSYTHIAS

Golden Bells

SPECTABILIS. A type very similar to *Intermedia*, in growth and habit, but having a much larger flower and many more blooms on each plant.

2-3 ft., 85c each; 3 for \$2.39
3-4 ft., \$1.00 each; 3 for \$2.69

SUSPENS. This is the only weeping form of the golden bells. Slender drooping branches strung with yellow flowers and followed by many shiny dark green leaves. May be used to good advantage on trellis and along the top of rock walls. Can be planted on banks, where it is difficult for other plants to grow.

2-3 ft., 85c each; 3 for \$2.39
3-4 ft., \$1.00 each; 3 for \$2.69

WITCH HAZEL

HAMAMELIS VIRGINIANA. A beautiful large shrub or small tree sometimes attaining a height of twenty-five feet. The flowers are bright yellow and appear in winter or early spring.

2-3 ft., 85c each; 3 for \$2.39

ILEX

VERTICILLATA. (Winterberry). One of the best bright red berried shrubs with the fruit hanging on all winter and being rarely eaten by the birds. Has been used extensively cut for winter decorations and looks well over a long period of time in a winter bouquet.

2-3 ft., \$1.00 each; 3 for \$2.69

HONEYSUCKLE

LONICERA BELLA ALBIDA. (White flowering Honeysuckle). Covered with white flowers followed by great fragrant clusters of red berries.

2-3 ft., 85c each; 3 for \$2.39
3-4 ft., \$1.00 each; 3 for \$2.69

LONICERA FRAGRANTISSIMA. (Winter Honeysuckle). Early pink and white fragrant flowers, with its bright green foliage retained all winter if somewhat sheltered.

2-3 ft., 85c each; 3 for \$2.39
3-4 ft., \$1.00 each; 3 for \$2.69

LONICERA MORROWI. (Morrow's Honeysuckle). A rounded spreading variety, blooms early in spring with creamy white flowers, later brilliant with a nice covering of crimson fruit.

2-3 ft., 85c each; 3 for \$2.39
3-4 ft., \$1.00 each; 3 for \$2.69

LONICERA TATARICA RUBRA. (Red Tatarian Honeysuckle). Light crimson flowers in early summer, with abundant red fruits following the flowers.

2-3 ft., 85c each; 3 for \$2.39
3-4 ft., \$1.00 each; 3 for \$2.69

LONICERA ZABELLI. A new honeysuckle to the gardener. Leaves are glabrous and the flowers are much redder than any of the other varieties which we have to offer. This variety is a good grower and is well used in border or group planting.

3-4 ft., \$1.00 each; 3 for \$2.69

HYPERICUM

AUREUM. Large brilliant double golden yellow flowers in spring on a dwarf shrub. Foliage dark green.

\$1.00 each; 3 for \$2.69

FORSYTHIA SPECTABILIS, GOLDEN BELL

MOCK ORANGE

PHILADELPHUS AUREA. (Golden Mock Orange). Very valuable to use in contrast with green foliage shrubs, foliage is small refined and a very brilliant yellow.

12-18 in., \$1.00 each; 3 for \$2.69

PHILADELPHUS CORONARIUS. (Old Fashioned Mock Orange). Blooms in very graceful sprays in May. Flowers white and slightly scented. May be used for tall screens. 3-4 ft., \$1.00 each; 3 for \$2.39

PHILADELPHUS VIRGINALIS. (New Virginal Mock Orange). A magnificent new variety with good foliage and a compact habit of growth. The flowers are double semi-double and single, the flowers being of the largest most beautiful and sweetest scented of all the mock oranges. It blooms the earliest and also the longest. It is without question the leader of the mock oranges.

2-3 ft., \$1.00 each; 3 for \$2.69
3-4 ft., \$1.50 each; 3 for \$3.95

RHODOTYPOS

RHODOTYPOS KERRIODES. (Jet Bead). Often called white Kerria. A well rounded shrub covered with light green leaves and large single white flowers, in May. Shiny black seeds in clusters follow the flowers and remain on the plant all winter.

2-3 ft., \$1.00 each; 3 for \$2.69

SHRUB ROSES

ROSA RUGOSA RUBRA. Single red flowers followed by showy apple-like fruit. Flowers and fruit persist all summer and fall. Excellent for grouping or individual beds. 2-3 ft., 85c each; 3 for \$2.39

TAMARIX

HISPIDA. (Spanish Tamarix). Very bushy with flowers in long upright panicles, bright coral pink, mid-summer. This variety blooms longest and is most used for cutting of both blooms and foliage.

2-3 ft., \$1.00 each; 3 for \$2.69

SUMMER GLOW. A tall shrub growing 8 to 10 feet high with fine feathery foliage. In June it has each branch densely covered with rich wine-red panicles of small flowers.

2-3 ft., \$1.00 each; 3 for \$2.69

SNOWBERRIES

SYMPHORICARPOS CHENAULTI. (Pink Snowberry). A new improved snowberry with large pink berries, that are very shiny and attractive throughout the winter. Very profuse in its production of flowers and fruit.

2-3 ft., 85c each; 3 for \$2.39

SYMPHORICARPOS RACEMOSUS. (White Snowberry). Small pale rose colored blooms followed by large clusters of pure white berries which hang on the plant all winter.

2-3 ft., 85c each; 3 for \$2.39.

SYMPHORICARPOS VULGARIS. (Red Snowberry). (Indian Currant). (Coral Berry). More compact than white snowberry. The narrow oval leaves are dull red and cluster tightly together along the drooping branches, a very good plant for foundation or steep bank planting.

2-3 ft., 85c each; 3 for \$2.39

SPIREA

ANTHONY WATERER. Dwarf plant with beautiful dark green foliage, well rounded shrub, with large brilliant rosy crimson flowers which last over a long season, but is at its best in midsummer.

12-15 in., 85c each; 3 for \$2.39

ARGUTA. (Snow Garland). More rapid and somewhat stronger grower than the Thunbergi type.

2-3 ft., 85c each; 3 for \$2.39

BILLARDI. Attains a height of five to six feet. It is crowned with fluffy pink tassel-like flowers from July to October. Scarcely twigged and branches upright. Blooms consistently and is very showy in group or naturalistic plantings

2-3 ft., 85c each; 3 for \$2.39

FROEBELLI. A fast growing Anthony Waterer type in both color of flower and foliage, but attains a height of four feet.

18-24 in., 85c each; 3 for \$2.39

THUNBERGI. Forms a dense feathery bush, with pale yellow-green foliage, changing in fall to a bright red and orange. Is covered with small white flowers in early spring.

2-3 ft., 85c each; 3 for \$2.39

VAN HOUTTI. The old favorite white spirea. Quite common but yet one of the best of all shrubs. A good grower with good foliage and masses of large white flowers. A perfect fountain of pure white blooms in May and June.

2-3 ft., 60c each; 3 for \$1.50; 10 for \$4.50

3-4 ft., 75c; 3 for \$2.00; 10 for \$6.00

HYDRANGEA

ARBORESCENS GRANDIFLORA. (Hills of Snow). In a mass planting the large bunches of flowers resemble a bank of snow, and are in bloom from July to September. By cutting back to the crown each year they may be kept round and dense. 18-24 in., 85c each, 3 for \$2.39; 2-3 ft., \$1.00 each, 3 for \$2.69.

QUERCIFOLIA. (Oakleaf Hydrangea). A very desirable shrub growing into round compact specimens three to four feet in height with very large crinkled, rough leaves. In the autumn the foliage turns to a beautiful shade of reddish bronze. 18-24 in., \$1.00 each, 3 for \$2.69.

PANICULATA GRANDIFLORA. (Pee-Gee Hydrangea). Fine for tall hedges or may be pruned to compact round clumps. Very attractive when laden with their massive blooms which are first snow white and then pink, finally becoming reddish bronze. 3-4 ft., \$1.00 each, 3 for \$2.69; 2-3 ft. 85c each, 3 for \$2.39.

PANICULATA GRANDIFLORA, TREE TYPE. Same as above but on stem about 3 or 4 feet tall forming a bushy head with its giant showy blooms. 3-4 ft., \$2.00 each; 3 for \$5.50.

NIKKO BLUE HYDRANGEA

GORGEOUS BLUE HYDRANGEA

NIKKO. The only hardy Blue Hydrangea which we have seen. It has withstood the last ten winters here at our nursery and during that time we recorded a temperature of 22 degrees below zero. Its flowers stay bright and fresh for a long time after blooming. The plants develop into broad clumps bearing in August a profusion of intense blue flowers. These showy plants attract attention and admiration wherever used. 2 yr. clump \$1.50 each, 3 for \$3.95; 1 yr. \$1.00, 3 for \$2.69.

WEIGELA

EVA RATHKE. The most distinct variety blooming later in July and most showy with its abundance of deep carmine flowers. 2-3 ft., \$1.00 each; 3 for \$2.69.

ROSEA. A good rank grower and is well used as a screen plant and it attains a height of twelve or eighteen feet. It is a good bloomer being covered with beautiful pink flowers. 3-4 ft., \$1.00 each; 3 for \$2.69.

NANA VARIEGATED. (Dwarf Variegated Weigela). Leaves margined and streaked creamy white. A fine shrub for contrast or foreground planting. It bears many pink flowers in June. 2-3 ft., 85c each; 3 for \$2.39.

PRIVETS

LIGUSTRUM AMURENSE. (Amur River Privet). A hardy northern group type, upright and tall growing, the leaves a good dark green and makes an ideal hedge.

	1-9	1-49	50 or more
12-18 in.	.20	.14	.10
18-24 in.	.25	.18	.14
2- 3 ft.	.35	.25	.18

LIGUSTRUM IBOTA. strong growing spreading shrub with small white flowers in June followed by a heavy crop of black berries which hang on well into the winter. This variety is widely used for wide hedges and for group plantings. 2-3 ft., 35c each; 10 for \$2.95.

	1-9	1-49	50 or more
18-24 in.	.30	.25	.20
2- 3 ft.	.40	.35	.30

LIGUSTRUM OVALIFOLIUM (California Privet). Quick growing dense straight well clothed shoots. A dark shiny green, most used where hardy.

	1-9	1-49	50 or more
12-18 in.	.20	.14	.10
18-24 in.	.25	.18	.14
2- 3 ft.	.35	.25	.18

LIGUSTRUM REGALIANUM. (Regal's Privet). Strong very hardy type with dark shiny leaves. The branches are stiff and horizontally spreading gracefully, drooping at the ends. All plants of this variety are grown from softwood cuttings and therefore are very uniform in type. 18-24 in., 50c each, 3 for \$1.39; 2-3 ft., 65c each, 3 for \$1.69.

SNOWBALL

VIBURNUM AMERICANUM. (American Cranberry). Covered with many bright red berries which hang on through the winter. Broad flower clusters with usually only the outer fringe fully open. 2-3 ft. 85c each, 3 for \$2.39; 3-4 ft. \$1.00 each, 3 for \$2.69.

V. CARLESI. (Fragrant Viburnum). It is usually in bloom about Memorial Day and is of added value as a cemetery plant, as the flowers last a great deal longer than the bloom on most plants. B&B, 15-18 in., \$2.00 each; 18-24 in., \$2.50 each; 2-3 ft., \$3.50 each.

V. DENTATUM. (Arrow Wood). May and June flowers of creamy white. The fruits are bluish black and appear in autumn. 2-3 ft., 85c each, 3 for \$2.39; 3-4 ft., \$1.00 each, 3 for \$2.69.

V. LANTANA. (Wayfaring Tree). Beautiful wrinkled leaves, with white flowers in May and June. The fruit varies in color from crimson to black. 2-3 ft., 85c each, 3 for \$2.39; 3-4 ft., \$1.00 each, 3 for \$2.69.

V. LENTAGO. (Nannyberry). Flowers of pure white in great clusters through May and June, with large bluish black fruit. 2-3 ft., 85c each, 3 for \$2.39; 3-4 ft., \$1.00 each, 3 for \$2.69.

V. OPULUS. (European Cranberry). Beautiful dense brilliant green foliage, with large bunches of crimson berries all winter. The flowers are dense clusters about four inches across and pure white. 2-3 ft., 85c each, 3 for \$2.39; 3-4 ft., \$1.00 each, 3 for \$2.69.

V. STERILIS. (Common Snowball). The old fashioned snowball that is in full bloom Decoration Day. It has large dazzling creamy white blooms, that when planted alone or in a mass give a wonderful show. 2-3 ft., 85c each, 3 for \$2.39; 3-4 ft., \$1.00 each, 3 for \$2.69.

LILACS

SYRINGA PERSICA. (Persian Lilac). Medium growing with slender branches topped with a purple spiked flower. 2-3 ft., 85c each; 3 for \$2.39.

SYRINGA VULGARIS. (Common Purple Lilac). The old fashioned but still beautiful light purple lilac, very fragrant and prolific bloomer. 2-3 ft., 85c each, 3 for \$2.39; 3-4 ft., \$1.00 each, 3 for \$2.69.

SYRINGA VULGARIS ALBA. (Common White Lilac). Similar to the above but with white flowers. 2-3 ft. \$1.00 each; 3 for \$2.69.

FRENCH HYBRID LILACS

All Varieties: 2-3 ft. \$2.00 each; 3 for \$5.50
BELLE DE NANCY. Large double flowers of rose satiny pink.

CHAS JOLY. Beautiful large double red flowered lilac.

LUDWIG SPATHE. Darkest of the Reds, a deep purlish red shade.

MAD. ABEL CHATNEY. Beautiful blooms of massive pure white flowers. Double.

PRES. GREVY. A compact flower of deep blue. Double.

PRES. POINCAIRE. An extra large flower of deep bluish purple which does not fade when coming into full bloom. Double.

VON HORSTENSTEIN. A recent importation and well worth a trial. It produces large spikes of clear lavender flowers which have a fragrance all their own.

VIBURNUM LANTANA

HARDY VINES

BOSTON IVY

AMPELOPSIS VEITCHI. This is one of the finest hardy climbers that we have that will cling to walls and probably the most popular. The color is bright green in summer changing to the brightest crimson and yellow in the autumn. 2 yr., No. 1, 75c each; 3 for \$1.95.

CLEMATIS

PANICULATA. Woody climbing vines which are covered with creamy white flowers. These vines are perfectly hardy and are old favorites. 2 yr. No. 1, 75c each; 3 for \$1.95.

JACKMANI. A very deep blue large flowered variety. \$1.25 each; 3 for \$3.49.

MAD. ANDRE. The best crimson-red we have seen of the large flowered varieties. \$1.25 each; 3 for \$3.49.

HONEYSUCKLE

LONICERA HALLIANA. A very dense vine used either as a ground cover or on a wall. It has creamy white flowers. 2 yr., 60c each; 10 for \$5.50.

LONICERA HECKROTHI. An exquisite new variety. Immense, showy clusters of trumpet-shaped buds with fragrant flowers, measuring up to 2 inches across. Outside petals brilliant flame-pink, inside a creamy golden yellow. Dark glossy foliage. Can be sheared to form a hedge or shrub or allowed to grow naturally as a vine. Blooms freely from early spring until heavy frost. 2 yr. plants \$1.00 each; 3 for 2.69.

SCARLET TRUMPET. This outstanding vine is well recommended where the space to be covered is not too large. The most brilliantly colored of all the honeysuckles it is indeed a fine show with its many coral-red blooms backed by beautiful blue-gray-green foliage. 2yr. No. 1, \$1.00 each; 3 for \$2.69.

BOSTON IVY

SILVER LACE VINE

POLYGONUM AUBERTI. A very rapid growing vine averaging 25 feet in a single season, producing a great profusion of silvery sprays from late summer into fall. The leaves are small and bright. 2yr. No.1, \$1.00 each; 3 for \$2.69.

WISTERIA

WISTERIA MAGNIFICA. Noblest and oldest of the vines. Often attains a great age with large woody trunk. The long flowers which are lilac blue with faint yellow spots, hang in large racemes. 2 yr. No. 1, \$1.25 each; 3 for \$3.49.

EUONYMUS VEGETUS

BROAD LEAF EVERGREENS

ANDROMEDA

PIERIS JAPONICA. A more upright plant than the Florabunda. The foliage is not so dark and has a very waxy appearance. It makes a very nice specimen and is one of our leading broad-leaf evergreens. B&B 12-18 inch, \$3.00 each; 18-24 inch \$4.50 each.

ILEX

GLABRA. (Ink Berry). Slow growing dense evergreen shrub, with small glossy leaves which will grow in heavy shade. Stands shearing well. Black berries produced in the fall hang on well into the winter. 15-18 in. \$2.50 each; 18-24 in. \$3.50 each.

EUONYMUS

COLORATUS. (Purple Leaf Creeping Euonymus). A purple leaf form of E. Radicans. This plant carries a rich green color throughout the summer and in the autumn turns to a purplish-red color which remains with it until spring. A wonderful plant for mass planting on banks and on stone-work. 15-18 in. 75c each; 10 for \$6.79.

PATENS. (Sieboldi). A spreading evergreen shrub with bright green foliage which carries the rich green color throughout the year. Best used in group planting and is an ideal plant for border work. 18-24 in. \$1.25 each.

RADICANS. This is the common evergreen Euonymus used so much for covering banks and for use on stone or brick as wherever the branches touch, small clinging holdfasts are produced which makes this an ideal plant wherever it is used. 12-15 in. 75c each; 15-18 in. \$1.00 each.

VEGETUS. (Big Leaf Wintercreeper). Bushy with round dull green leaves. This plant is a sight in winter when it is covered with its bright scarlet fruit. 15-18 in. \$1.00 each, 3 for \$2.69; 18-24 in. \$1.50 each, 3 for \$3.95.

TREES FOR SHADE

BIRCH

BETULA ALBA LACINATA. (Cut Leaf Weeping Birch). The bark is similar to the white birch in color. The tree is tall and slender, but a vigorous grower with graceful and weeping habit, together with the cut leaf foliage presents such beauty as has never been seen before in a single tree. Wonderful lawn specimen, often planted in a row to edge the drive. **6-8 ft. \$3.50 each, 3 for \$9.00; 8-10 ft. \$4.50 each, 3 for \$12.00.**

MAIDENHAIR TREE

GINGKO BILOBA. (Salisburia). An elegant ornamental shade tree that is prized for its fern-like foliage. Its angular shape and long slender limbs are unique. Imported from southeastern Asia. **5-6 ft. \$3.00 each; 6-8 ft. \$4.00 each.**

EUROPEAN PLANE

PLATANUS ORIENTALIS. (Sycamore). Often called oriental plant tree. Usually used along streets and new allotments where quick shade is required. A lofty wide spreading tree with deeply lobed leaves. The bark is grayish green in the summer, but it sheds its bark in spots, giving it a mottled appearance as the spots of its trunk that are revealed are a creamy white. **6-8 ft. \$3.00 each; 8-10 ft. \$4.00 each.**

CUT-LEAF WEEPING BIRCH

MAPLES

ACER DASYCARPUM. (Silver or Soft Maple). A hardy rapid growing native tree of beautiful proportions. Its rapid growth and large size is valuable for quick shade. Its leaves are good sized light green above and silvery beneath, turning to a light red and bronze in autumn. It produces shade quicker than any other variety. **6-8 ft. \$2.25 each; 8-10 ft. \$3.00 each.**

ACER PLATANOIDES. (Norway Maple). A large tree with dark dense green foliage. It develops into a formal round head and produces very dense shade. A very slow grower but one is well repaid for waiting. **8-10 ft. \$4.50 each; 1 1/4 to 1 1/2 in. \$5.50; 1 1/2-2 in. \$6.50 each.**

ACER SCHWEDLERI. The purple leaved Norway. Its dark leaves attract attention at all times but are unusually fine in spring, when their unusual color contrasts beautifully with the green of other trees. In autumn they gradually turn to a golden yellow. **8-10 ft. \$5.00 each; 1 1/4 to 1 1/2 in. \$7.50.**

ACER SACCHARUM. (Sugar Maple). This is a great spreading tree symmetrical and of grand proportions. Its green leaves turn to a scarlet and yellow in the autumn. **8-10 ft. \$4.50 each; 10-12 ft. \$6.00 each.**

WEeping WILLOW

SALIX BABYLONICA. (Weeping Willow). Tall, upright, massive in form, with its long, slender branches growing straight downward. Weeping Willow is always attractive. It is especially so in summer when the pendulous branches sway gently in the breezes, and the long, slender, lustrous green leaves show a bright silver reflex. Willows grow rapidly, will thrive in wet places and like to be near water, but do not mind being planted elsewhere, as they grow heartily in almost any location. **6-8 ft. \$3.00 each; 8-10 ft. \$3.50 each.**

ELMS

ULMUS AMERICANA. (American Elm). Most beautiful and stately of all our shade trees. Fast in growth with a rounded graceful drooping top. Indispensable as a shade tree because of its great spreading branches.

6-8 ft. \$3.00 each; 8-10 ft. \$4.00 each

ULMUS MOLINE. (Moline Elm). A valuable new type of elm of compact but rapid growing habit. It has very large leaves that are very dark blue-green in color, with the bark smooth and glossy.

6-8 ft. \$3.00 each; 8-10 ft. \$4.00 each

ULMUS PUMILA. (Chinese Elm). A type especially adapted to dry locations but does well under any normal conditions. In this section we consider it a partial dwarf because it grows so slow but it develops into a small compact tree.

6-8 ft. \$3.00 each; 8-10 ft. \$4.00 each

POPLAR

POPULUS NIGRA ITALICA. (Lombardy Poplar). Often attains the height of 100 feet or more. Old trees that were well placed when planted are today outstanding landmarks. The leaves are a rich shiny green with the under side slightly lighter. A good tree for accent. **6-8 ft., \$1.50 each, 3 for \$3.95; 8-10 ft., \$2.50 each, 3 for \$6.75.**

Ornamental and Flowering Trees

FLOWERING CRAB

RED FLOWERING PEACH

AMYGDALUS PERSICA. (Double Red Flowering Peach). A beautiful red flowering small tree which is indeed one of the showiest when it breaks into full bloom in the early spring. Its flowers are large and double and can be used to great advantage either as a lawn specimen or in a shrub planting. 3-4 ft. \$1.50 each; 4-5 ft. \$2.00 each.

RED BUD

CERCIS CANADENSIS. (Red Bud or Judas Tree). A small tree of irregular form with attractive heart-shaped leaves. When the great quantities of small rose-colored blooms appear before the leaves, it gives one the impression of a cloud of pink smoke from the distance. 3-4 ft. \$2.00 each; 4-5 ft. \$3.00 each.

FLOWERING DOGWOOD

CORNUS FLORIDA. (White Flowering Dogwood). The flowers are three or four inches across and appear in great profusion in spring before the leaves are out. The foliage is grayish green and is very handsome, and in the autumn turns to a rich crimson hue. Used individually or in groups both for its white flowers and its autumn colors. 3-4 ft. \$2.00 each; 4-5 ft. \$3.50 each.

CORNUS FLORIDA RUBRA. (Red Flowering Dogwood). A slow grower making small compact growth covered with large red flowers in early spring. And like the Florida its leaves turn crimson red in autumn. 3-4 ft. \$4.00 each; 4-5 ft., B&B \$7.50 each.

FLOWERING HAWTHORNS

PAUL'S SCARLET. Deep crimson-scarlet, very double. This is one of the most attractive small trees for specimen planting. 3-4 ft. \$3.00 each; 3 for \$8.00.

FLOWERING CRABS

MALUS ELEYI. (Red Flowering Crab). The young shoots are fuzzy and covered with red foliage resembling the Japanese maple. The flowers are rich red in color and appear in clusters much like apple blossoms, followed in the fall by red fruits in large clusters which are very attractive. 3-4 ft. \$2.00 each; 4-5 ft. \$3.00 each.

MALUS HOPA. (Hopa Crab). A very attractive variety of strong upright growth. It bears a profusion of very large double flowers of an unfading rose-red. The fruits are large, edible, with a distinctive red flesh. 3-4 ft. \$2.00 each; 4-5 ft. \$3.00 each.

MALUS IODENSIS PLENA. (Bechtel's Crab). The only perfectly double flowered crab. Its many delicate pink blooms appearing like small pink roses of delightful fragrance. A very popular type and much desired for the home grounds. 2-3 ft. \$1.25 each; 3-4 ft. \$1.75 each; 4-5 ft. \$2.25 each.

FLOWERING PLUM

PRUNUS TRILOBA. The flowering plum blooms early in May, before the leaves come out. The delightful double, bright pink, flowers on every twig so thick that no wood is visible. A gorgeous sight in spring. 2-3 ft. \$1.25 each.

PRUNUS CISTERNA. A small tree which has small pinkish white flowers, but being used largely for its bright red leaves. 3-4 ft. \$1.50 each.

PLUNUS NEWPORT. Similar to the above variety, but grows a little larger and the color of the leaves is a trifle darker, and may be used where a little larger tree is desired. 3-4 ft. \$1.50 each; 4-5 ft. \$2.00 each.

MOUNTAIN ASH

SORBUS AUCUPARIA. (European Mountain Ash). A large ornamental tree with compound ornamental leaves; white flowers in spring and clusters of bright orange red berries in the fall. Grows to a large size. Very attractive. 6-8 ft. \$3.00 each; 8-10 ft. \$4.00 each.

Evergreen Trees

All Evergreen Prices Are With Trees Balled and Burlapped

PYRAMID ARBORVITAE

ARBORVITAE

THUJA OCCIDENTALIS NIGRA. (Dark Green American Arborvitae). (White Cedar). Upright, broad based dark green foliage, dense, from the ground up. 2-3 ft. \$2.75 each; 3-4 ft. \$5.00 each.

THUJA COMPACTA. (Compact Globe Arborvitae). Dwarf dense little trees with light green foliage, very neat and attractive. 12-15 in. \$1.50 each; 15-18 in. \$2.00 each.

THUJA PYRAMIDALIS. (Pyramidal Arborvitae). A very dense columnar type, with dark green foliage, probably the most compact and erect of all the Arborvitaes. 2-3 ft. \$3.00 each; 3-4 ft. \$4.00 each.

HEMLOCK

TSUGA CANADENSIS. Its long branches droop gracefully to the ground and bend willingly in a faint breeze. A conical tree tapering from a broad base at the ground to a long straight thrifty shoot at the top. The leaves are rich dark green, having a grayish cast on the under side. 2-3 ft. \$5.00 each; 3-4 ft. \$6.50 each.

JUNIPERS

JUNIPERUS BURKI. (Silver Cedar). A much thicker and better grower than Glauca, but does not have quite as blue a color. 2-3 ft. \$3.50 each; 3-4 ft. \$5.00 each.

JUNIPERUS DEPRESSA PLUMOSA. (Andora Purple Spreading Juniper). In the spring and throughout the growing season it is of a bright silver color, but in the autumn and through the winter it is a bright purple red color. 15-18 in. \$2.00 each; 18-24 in. \$3.00 each.

JUNIPERUS VIRGINIANA CANNARTI. (Cannarti Juniper). It has deep rich green heavily tufted foliage, keeping this fine color throughout the winter. It can easily be trimmed and thus kept at any desired size. 2-3 ft. \$4.50 each; 3-4 ft. \$6.00 each.

JUNIPERUS VIRGINIANA GLAUCA. (Blue Cedar). When the new growth comes out in the spring it is steel blue in color and this sets the plant off to a great advantage. 2-3 ft. \$4.50 each; 3-4 ft. \$6.00 each.

JUNIPERUS VIRGINIANA KETELERI. (Keteler Juniper). The foliage is fine, and a grayish green in color. Often used in place of the more popular Pyramidal Arborvitae, but is better and should always be planted where it may receive partial or full sunlight. 2-3 ft. \$4.50 each; 3-4 ft. \$6.00 each.

RETINOSPORAS

PLUMOSA. Upright with good green foliage giving the appearance of a very large mass of plumes. Very attractive when these graceful branches are being swung slightly in a breeze. 2-3 ft. \$3.00 each.

PLUMOSA AUREA. A very beautiful, compact plant with its golden yellow foliage, which is soft and plume-like. A good plant to use in a mass planting as its yellow color shows up to an advantage over green evergreens. 2-3 ft. \$3.00 each.

YEW

TAXUS CUSPIDATA. A medium upright and spreading variety and may be successfully trimmed either way.

15-18 in. \$3.50 each; 18-24 in. \$5.00 each.

TAXUS HICKSI. (Hick's Yew). A close, compact pyramidal tree. A very rich dark green and may be used in place of the favorite pyramidal Arborvitae.

15-18 in. \$3.50 each; 18-24 in. \$5.00 each.

TAXUS INTERMEDIA. A half spreading and half upright type of Yew, with heavy dark green foliage. We consider it the best of all the Yews.

15-18 in. \$3.50 each; 18-24 in. \$5.00 each.

ROSES

	Each	6	12
BLUE RIBBON	\$1.10	\$6.00	\$11.00
RED RIBBON90	5.00	9.00

Ami Quinard. Dark velvety crimson.
C. K. Douglas. Brilliant crimson with scarlet undertone.
Etoile De Holland. Good foliage and beautiful red flowers.
Mrs. E. P. Thom. The best of the clear yellow roses.
Grenoble. Scarlet red without shading.
General MacArthur. Excellent foliage, crimson scarlet blooms.
Joanna Hill. Clear yellow with orange-yellow heart.
K. A. Victoria. Unexcelled pure white.
Mad. Jules Bouche. White flowers lightly tinted with pink in center.
Margaret McGreedy. Brilliant red touched with gold.
McGreedy's Scarlet. Large, perfect shaped flowers.
Pres. Hoover. A blend of moroon, orange and gold.

MRS. E. P. THOM

SISTER THERESE

Pres. Plumcocq. Coppery yellow and apricot.
Sister Therese. Dark golden yellow.
Talisman. Yellow with copper-red and orange rose.

CLIMBING ROSES

\$1.10 Each; 10 for \$9.98

Climbing American Beauty. Large, double rose red flowers.
Dr. Van Fleet. Delicate flesh white.
Jacotte. A blend of orange, copper apricot.
Mary Wallace. Large flowered pink climber.
Paul's Scarlet. Vivid scarlet red, with very long blooming season.

BABY RAMBLERS OR POLYANTHA

\$1.10 Each; 10 for \$9.98

Gloria Mundi. Fully double orange scarlet.
Lafayette. Each flower 3 inches in diameter, cherry-crimson.
Red Lafayette. Each flower 3 inches in diameter cherry-red.

*Available In Clumps

PEONIES

‡Available In Divisions Only

Divisions \$1.00 each; Clumps \$2.00 each

‡**Baroness Schroeder.** White with shadings of flesh.
‡**Courronne D'or.** Immense white blossoms with crimson blotches. Late.
***Edulis Superba.** Extra early, crown type, old-rose pink.
‡**Felix Crousse.** Medium sized very brilliant red flower, dark green foliage.
‡**Festiva Maxima.** Pure white with crimson splashes in center.
‡**Marchioness of Lansdowne.** Large white flowers sometimes changing in color to silvery pink.
***Mons Jules Elie.** Glossy lilac pink shading a deeper pink at the base, the entire flower overlaid with a silver cast, making wonderful cut flowers.
***President Taft.** Delicate hydrangea pink, completely enveloped in a halo of white. Profuse bloomer.
***Sarah Bernhardt.** A late bloomer, flat, compact, rose type, rose pink with silver tip. A bright apple-blossom pink, very free flowering of perfectly formed flowers.
